Drop Down Tracker Field

This tracker field allows you to create a drop down list of values.

Put the values you want listed in a comma delimited list. Note: Do not leave spaces between the comma delimited items.

- Ex: Yes, No, Maybe **correct**
- Ex: Yes, No, Maybe **incorrect**

Tiki > 1.9.7: If you repeat a value, this value will be used as the default value and will be pre-populated in your tracker form. In the example below, there are four different values for the dropdown with "1-2" as the default value.

<table>
<thead>
<tr>
<th>Name:</th>
<th>Matches per week</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type:</td>
<td>dropdown</td>
</tr>
<tr>
<td><strong>Dropdown options: list of items separated with commas</strong>. Default value is specified by having the value indicated twice consecutively.</td>
<td>1-2, 1-2, 2-3, 3-4, 4, 4 or more</td>
</tr>
</tbody>
</table>

Is column visible when listing tracker items?  
Column links to edit/view item?  
Column is searchable?  
Field is public? (for use thru trackerlist plugin)  
Field is hidden?  
Field is mandatory?  
Order  

If the field is optional, an empty value will be automatically added at the top of the values. The options are automatically translated. See Interface translation (old) to know how to add a translation.

Note that each value must be unique. IE: it is not possible to do

0=false, 1=true, 1=almost true, 0=almost false

Drop Down with other value

tiki>=1.9.7

The field works as the Drop Down field, except that it proposes a text field to enter an alternative value.

Radio Tracker Field

tiki >= 2.0

The field works like a drop down field but displays a radio choice.

If you repeat a value, this value will be used as the default value and will be pre-populated in your tracker form.
If the first value of the option is the string '<br>', each option display will be on a different line - otherwise they will be on the same line (tiki>=2.1)

Sample with default selected value and label

```
y=yes,y=yes,n=no
```

Multilingual
Each option in all the fields are translated before being displayed. See Multilingual trackers.

Sample with default selected value and label in non-latin language

```
לא,כן=כן,כן,לא
```

Very long lists
For very long lists, you can use Items List and Item Link Tracker Fields

Alias
- Drop Down / Radio Tracker Field
