

Update: Since Tiki 7. this field has become the [Location Tracker Field](#). For more info, read below.

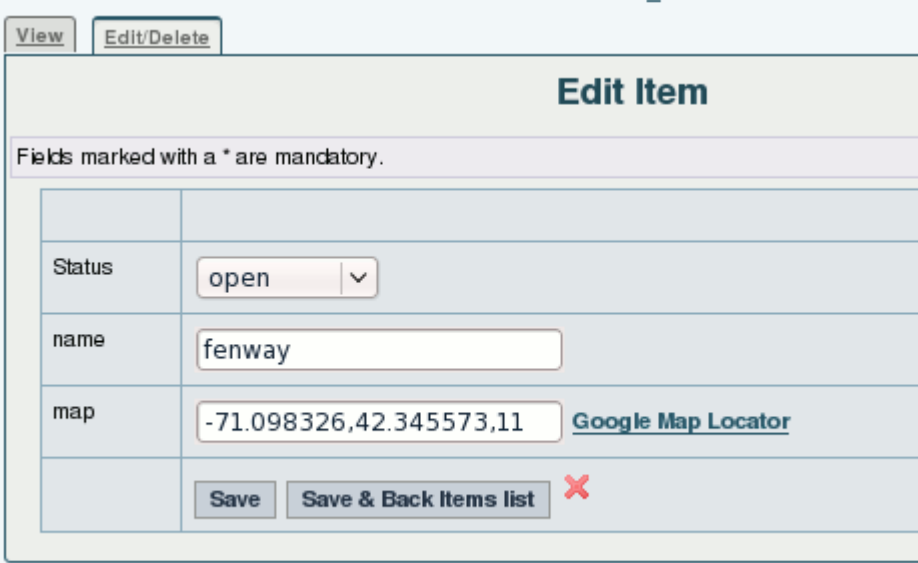

Google Maps Trackers Field

This field allows you to add a google map in your [tracker](#). In Tiki7, this has become [Location Tracker Field](#) so as to also support [OpenStreetMap](#).

Parameters

None

Input field

The screenshot shows a web form titled "Edit Item" with two buttons at the top: "View" and "Edit/Delete". Below the title, a note states "Fields marked with a * are mandatory." The form contains three input fields: "Status" with a dropdown menu showing "open", "name" with a text input containing "fenway", and "map" with a text input containing "-71.098326,42.345573,11" and a link labeled "Google Map Locator". At the bottom of the form, there are two buttons: "Save" and "Save & Back Items list", with a red "X" icon to the right of the second button.

The coordinates must be entered as x,y,zoom

where x is the x coordinates or the latitude and y is the Y coordinate or the longitude and zoom is the zomm level (0 for all the earth, 13 can be a town level)
