

# Rating Tracker Field

This is a [stub](#)

Introduced in [Tiki8](#), this is the corresponding tracker field to the feature [Rating](#) and [Advanced Rating](#).

In [Tiki12](#), at least, you have 3 modes:

- Stars
- Radio Buttons
- Single option: e.g. Like

You can also set the labels to something else different from the real values that will be stored for the calculation of average, etc.

In this example, below, the tracker field Rating was set with:

- Option: -2,-1,0,1,2
- Mode: Stars
- Labels: -2,-1,0,1,2

## Tracker: Bugs & Wish list

The screenshot shows a web interface for a tracker titled "Tracker: Bugs & Wish list". At the top, there are two buttons: "Trackers" and "View Items". Below these is a link: "If this is your first time, please read: [How to Submit a new item on the Wish](#)". There are two tabs: "Tracker Items" and "Insert New Item". The main content area shows a list of items with the following columns: "New Rating", "Subject", and "Subj".

The first item has a rating of 1 (one yellow star) and the subject "Monitoring pre-dogfood servers".

The second item has a rating of 2 (two yellow stars) and the subject "Together: make it work for wiki pages, spreadsheet, drawing, ...". A tooltip is displayed over the second star, showing "Number of votes: 2, Average: 1.5, Your rating: 2".

The third item has a rating of 1 (one yellow star) and the subject "Screencasts in comments: no longer showing".
