Rating Tracker Field

This is a stub

Introduced in Tiki8, this is the corresponding tracker field to the feature Rating and Advanced Rating.

In Tiki12, at least, you have 3 modes:

- Stars
- Radio Buttons
- Single option: e.g. Like

You can also set the labels to something else different from the real values that will be stored for the calculation of average, etc.

In this example, below, the tracker field Rating was set with:

- Option: -2,-1,0,1,2
- Mode: Stars
- Labels: -2,-1,0,1,2
