

# Action Calendar

The Action [calendar](#) is a [module](#) which shows system events in a chronological order. Also known as the Tools Calendar

Please add this page to the [refactor](#) list. The feature has changed substantially and the graphics no longer show what the user will experience. Especially the 2nd one.

# Event Listing

Once you have the calendar active you can click on a day to see the listing of events for that day. (sorry for the slightly chopped up screenshot)

The screenshot shows the 'Tiki Action Calendar' interface. At the top, there are navigation buttons: 'Do not group by item', 'Filter', and 'List View'. Below these are icons for different calendar views: Day (selected), Week, and Month. The current date is 'Tuesday 11 of November, 2008'. Navigation arrows for 'Day', 'Week', and 'Month' are also present. A horizontal bar shows 'November 11' with left and right arrows. The main content is a table with two columns: 'Hours' and 'Events'.
