Apply Profiles tab

Overview

Use this tab to select an apply a profile from a repository to your Tiki

To Access

From the Profiles Admin page, click the **Apply Profiles** tab.

Note

Starting in Tiki3 the profile system is a powerful and versatile system that can be managed by the Tiki community. See http://profiles.tiki.org. Profiles give the installer a choice of partially configured sites to install. They give a head start on the configuration process by picking a type of site that is similar in purpose.

Setting	Description	Default
Fieldset or section		
Field name	Description	Value

Apply Profiles tab

Starting in version 2.x (as a hidden feature) and specially after 3.x, you can point your browser to **tiki-admin.php?page=profiles** ("Admin home > Profiles"), allowing to set up at any time bunches of features in a certain way to produce specific use case of interest.

New Tiki 2.x and 3.x profile system

Old profile system (< Tiki 2.x)

In Tiki 1.9, profiles were only active during the installation process. You could not go back and pick a different profile unless you re-installed the database, losing all your changes.

Selection of profile at http://yourdomain/tiki-install.php?lang=XX

Requirements

Your php must have the option allow_url_fopen On or must have the library curl installed.
Javascript must also be enabled on your browser

Details of Supported Profiles

Tiki 3.x

See http://profiles.tiki.org

Tiki 3.x

See http://profiles.tiki.org

"Profiles" up to Tiki 1.9.x was a feature used only when you install Tikiwiki. It set up the Tikiwiki according to an existing configuration that was "saved" from another site.
Until version 2.x, this feature is only active during the installation process. You could not go back and pick a different profile unless you re-installed the database, losing all your changes.
