

This page should [merge with Articles](#)

# Articles Config

## ADMIN ACCESS

To access administration, go to **Home Page** and, on the **Menu**, click on "**Admin (click!)**".

## SECTIONS: TIKI ADMIN PANEL

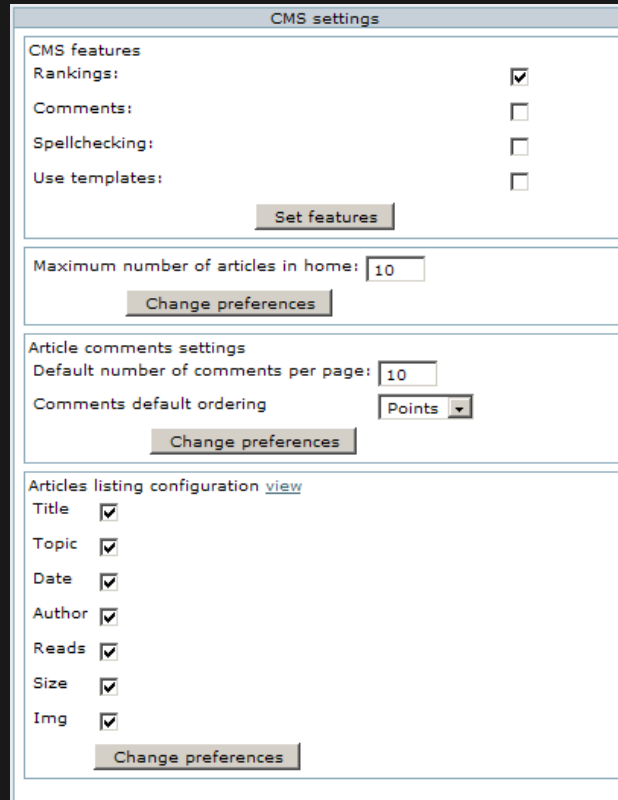

You will access the **Sections** Tiki Admin Panel (see [Admin Panels](#) ), as shown in this graphics:

# ARTICLE/CMS SETTINGS

From the Tiki Admin Panel, click the Articles icon to display the Articles setup panel, the top of which appears like so:

A screenshot of the 'CMS settings' panel in the Tiki Admin interface. The panel is divided into three main sections. The first section, 'CMS features', contains four checkboxes: 'Rankings:' (checked), 'Comments:' (unchecked), 'Spellchecking:' (unchecked), and 'Use templates:' (unchecked). Below these is a 'Set features' button. The second section contains a text input for 'Maximum number of articles in home:' set to '10', with a 'Change preferences' button below it. The third section, 'Article comments settings', includes a text input for 'Default number of comments per page:' set to '10' and a dropdown for 'Comments default ordering' set to 'Points'. It also has a 'Change preferences' button. The final section, 'Articles listing configuration', has a link 'view' and a list of checkboxes for 'Title', 'Topic', 'Date', 'Author', 'Reads', 'Size', and 'Img', all of which are checked. A 'Change preferences' button is at the bottom of this section.
