

# AutoLinks

When the AutoLinks option is enabled, Tiki will automatically transform any website or email addresses that you type in a wiki textarea into a clickable hyperlink. It is similar but different to Hotwords.

Use AutoLinks as a shortcut for creating links with Tiki's Wiki Syntax (that is, using [http://www.tiki.org]).

# AutoLink Examples

For example:

- Typing **www.tiki.org** will produce:  
www.tiki.org
- Typing **http://www.tiki.org** will produce:  
http://www.tiki.org
- Typing **info@tikiwiki.org** will produce:  
info at tikiwiki.org
