

# Calendar Invitations by email

New in [Tiki21](#), you can manage calendar invitations, powered by [SabreDAV](#), and using Tiki [Webmail](#). See also [CalDAV](#). This development was done as part of [Email as a first-class citizen](#).

## HOW TO ACTIVATE

The screenshot shows a web browser window with the URL `tiki-admin_calendars.php?calendarId=4&cookietab=2`. The page contains a form for editing a calendar invitation. The form has the following fields:

- Name:** A text input field containing the word "Test".
- Description:** A large, empty text area.
- Custom location:** A dropdown menu with "No" selected, and a checkbox labeled "Show in popup box" which is unchecked.
- Custom participants:** A dropdown menu with "Yes" selected, and a checkbox labeled "Show in popup box" which is unchecked.
- Custom classification:** A dropdown menu with "No" selected, and a checkbox labeled "Show in popup box" which is unchecked.

A red curved line is drawn across the bottom three rows of the form, highlighting the "Custom location", "Custom participants", and "Custom classification" sections.
