

In Tiki 7 we started to move from GoogleMaps (GMap) to OpenStreetMaps, respectively OpenLayers, which offers a GoogleMap layer. Latest since Tiki 13 we are using only OpenLayer (OpenStreetMap) and step b step remove(d) ll code from old MaServer and GMap.

Please visit the following pages, if you want to use Maps in Tiki:

[OpenLayers](#), [Maps](#), [PluginMaps](#)

**Please mind: This page stays here only for historic reasons and to guide to [Tiki's OpenLayers page](#)**

# Google Maps

## Overview

The Google Maps function provides support for the Google Maps Plugin and the Google Maps Tracker Field.

## To access

Click the **Google Maps** icon  on the [Admin Panel](#)

or

Access **<http://example.org/tiki-admin.php?page=gmaps>**
