leed

needed to use the email address of the current user to fill out a form field. (long story as to why)

Explanation

nere exist some Wiki Argument Variables that allow one to use some variables that are part of the tiki current instance. For example {{user}} will displanted as userid of the current user: . My first idea was to implement the same thing for to display the email id of the current user.

is generally considered a bad idea to insert email addresses into wiki or web pages as spammers can scrape and use them. I believe this is why the idea frowned upon. So thanks to Jonny's suggestion I came up with the following solution instead.

1ethod

Add the following custom.php to your tiki language directory, mine is in lang/en/ or lang/en-uk/
