

Improve Tracker Forms

You can improve tracker forms enabling an experimental jquery user interface library called "**Chosen**"

ENABLE THE FEATURE

You can enable the feature in:

Admin home > Features > Interface (tab) > jQuery plugins and add-ons > Experimental > jQuery-ui Chosen Menu

The screenshot shows the 'Interface' tab of the Tiki23 admin panel. The 'jQuery plugins and add-ons' section is expanded, showing various plugins. The 'jQuery UI Theme' is set to 'flick'. In the 'Experimental' section, the 'jQuery-ui Chosen Menu' checkbox is checked and highlighted with a red box. Other experimental options include 'jQuery Infinite Carousel' (unchecked) and 'jQuery Sortable Tables' (checked). The 'Mobile' section at the bottom shows 'Mobile Access' (unchecked) with a warning icon and the text 'You need to set Perspectives'. An 'Apply' button is at the bottom right.

Global features	Interface	Programmer	No Tabs
Ajax			
<input checked="" type="checkbox"/> Ajax

DROP DOWNS

You can choose a value from a dropdown box by selecting the items in the list through scrolling down, as usual, or you can nowadays filter the list values based on the text you type at the top.

Subject*

Subject or short summary of the issue (max 255 characters)

Importance

10: Popular feature, many people want it 9: Useful feature, but not many people want it 8: Useful feature, but not many people want it 7: Useful feature, but not many people want it 6: Useful feature, but not many people want it 5: Useful feature, but not many people want it 4: Useful feature, but not many people want it 3: Useful feature, but not many people want it 2: Useful feature, but not many people want it 1 low: Useful feature, but not many people want it

Easy to solve?

10 Easy: 5-10 minutes of work 9 Easy: 5-10 minutes of work 8 Easy: 5-10 minutes of work 7 Easy: 5-10 minutes of work 6 Easy: 5-10 minutes of work 5 Easy: 5-10 minutes of work 4 Easy: 5-10 minutes of work 3 Easy: 5-10 minutes of work 2 Easy: 5-10 minutes of work 1 Easy: 5-10 minutes of work

Feature

MULTIPLE SELECTION

Similarly, a section to allow multiple selection of items can be shown in a small but enhanced dropdown box, which allows the user to select one or many of the options, remove them from the list in the text field at the top:

The screenshot shows a form with several input fields. At the top, there is a dropdown menu labeled 'Easy to solve?' with the value '5' selected. Below it is a text field with a placeholder '10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work'. Below that is a text field labeled 'Feature' containing 'Accounting' and 'Article'. Below that is a dropdown menu labeled 'Category' with a red asterisk. The dropdown is open, showing a list of options: 'Bug: Regression', 'Bug: Usability', 'Blocker', 'Bug: conflict of two features (each works well independently)', 'Bug: Consistency', 'Bug: Error', 'Bug: Security', 'Community projects', 'Documentation (or Advocacy)', 'Dogfood on a *.tiki.org site', 'Feature request', and 'Incident'. The 'Blocker' option is highlighted. Below the dropdown is a text field labeled 'Tiki Version' with a placeholder 'Category of'. At the bottom, there are two checkboxes: '8.x' and '9.x'.

Click to expand

FILTERING DISPLAYED OPTIONS BY TYPED TEXT

Additionally, you can also filter the values displayed in the dropdown so that only those matching your typed text are shown in the list (only the ones starting with "D" in the example below: Documentation and Dogfood a *.tiki.org site).

Easy to solve?

10 Easy: 5-10 minutes to fix, no risk of regression, etc. 5 Medium: a few hours 1 Difficult: Requires days of work
