Mail notifications

The Mail notifications interface is found under Admin' → Mail Notifications".

Email notification allows you to receive an email when certain events occur on your Tiki site. The current list of events that can trigger mail are

- a user registering
- a user posting an article
- any wiki page is changed
- any wiki page is changed, even minor edits
- a comment is posted or changed in a wiki page
- file galleries quota is exceeded
- PHP error

Permissions:

- no permission is checked when using an email setting. You can with this overpass the permission checking.
• tw
• tw >=4.0: permissions are checked if you use a user setting - a user watching any page change will not receive a notification if the page he can not see change

Note: If you want to delete an email from all your site. There is a list of places to check

• admin->Mail notifications
• the tables tiki_user_watches, tiki_mail_events
• newsletters subscription
• tracker->edit->outbound email
• forum->edit->outbound email
• myTiki->addressbook
• admin->general->sender email
• tiki-contacts.php
• admin->users
• this list is not exhaustive
