

# Meta tags tab

## Overview

Use this page to include `< meta >` tags within the `< head >< /head >` elements of your Tiki pages.

## To Access

From the [Meta Elements](#) Admin page, click the **Meta Tags** tab.

## Note

Many search engines use this information to index your site and to format information on results pages.

## **Description**

A list of keywords (separated by commas) that describe this website.

If the Tags feature is enabled, the tags for each page with tags set will be used as meta keywords. This allows individual pages at the site to have different meta tags.

Description

Page description

Custom Meta robots

Author

# Description

Use the forum thread title in the meta title tag.

A short description of the website. Some search engines display this information with the website's listing.

Use each page description as the title meta tag for that page.

Add the ability to set custom meta robots on each wiki page that will override the global meta robots value.

The author of this website. Typically this is the Admin or Webmaster.
