Mod author

This wikiplugin mod allows different content to be displayed depending on whether the user visiting the page is the creator of the page, a contributor or other user. (See Mods User for how to install a mod.)

Usage

Use the following syntax:

{AUTHOR(contributor=y|n)}some text{ELSE}other text{AUTHOR}

Parameter	Accepted values	Effect	Since
contributor	y or n (default: n)	If set to y, only a contributor to the page will see the content (or the content before {ELSE}), if n, only the creator.	

A couple of tips on usage:

- The use of {ELSE} is optional
- Contributors cannot be specified if the history for the page has been deleted

Example

With this code,

{AUTHOR(contributor=y)}''This note is for contributors to this page.''{ELSE} ''This note is for users who have not ye
contributed to this page.'' {AUTHOR}

Contributors would see: *This note is for contributors to this page.*
Other visitors would see: *This note is for users who have not yet contributed to this page.*
