

# Module calendar\_new

*Introduced in version 3.0*

This [Module](#) adds a small calendar that allows to see the events of the current month, basic data in the calendar box, and the other info on a hover box while passing the mouse over.

## PARAMETERS

Includes a calendar or a list of calendar events.

[Go to the source code](#)

*Preferences required: feature\_calendar*

---

## Parameters

## Accepted Values

calIds

---

## **Description**

If set to a list of calendar identifiers, restricts the events to those in the identified calendars. Identifiers are separated by vertical bars ("|"), commas (",") or colons (":"). Example values: "13", "4,7", "31:49". Not set by default.

**Default**   **Since**

month\_delta int

viewmode word

linkall word

showaction word

Distance in month to the month to display. A distance of -1 would display the previous month. Setting this option implies a calendar view type with a month time span.

Example values: 2, 0, -2, -12.

If in calendar (or "table") view type, determines the time span displayed by the calendar. Possible values: year, semester, quarter, month, week, day. A user changing this time span in the calendar can change the time span the module displays for him.

y|n

y|n

month

n

y

viewnavbar word

viewlist word

viewmodelink word

---

y|n|partial

Determines how to show events. Possible values: table, list.

week|day

---

y

table

week

## USAGE

The assigned module looks like this:

The screenshot shows a calendar module with a grid for the month of March. The days of the week are labeled S, M, T, W, T, F, S. The dates are arranged in a grid. The date 09 is highlighted in green. Below the calendar, there is a time slot for 10:29 > 10:29, with a description: - SESSIÓ FTIC, 17:30 CEST - 20:30 CEST. A mouse cursor is pointing at the date 30.

S	M	T	W	T	F	S
01	<a href="#">02</a>	<a href="#">03</a>	04	05	06	07
08	<b>09</b>	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	<a href="#">27</a>	28
29	<a href="#">30</a>	<a href="#">31</a>	01	02	03	04

**10:29 > 10:29**

- SESSIÓ FTIC, 17:30 CEST - 20:30 CEST

If you change the main Tiki [calendar](#) view (for example, semester mode), the calendar module will be updated accordingly.

You can specify if you want to see the events in a popup for each day. The calendars are specified in the params box of

admin->modules

callds[]=1&callds[]=2

To see the calendar 1 and the calendar 2

Be careful: permissions are not checked on the calendar
