

'Log in' Module (login_box)

This Module allows users to login to Tiki. Based on your selections on the Admin: Login page, there may be additional fields on the module:

- If you enable the **Users can register** option, the module will include a link to the Registration form.
- If you enable the **Remind passwords** option, the module will include a link to the I Forgot My Password form.
- If you enable the **Remember me** option, the module will include a Remember Me checkbox.
- If you enable the **HTTPS login** option, the module will include links to use standard or secure login.
- If you enable OpenID authentication, the module will include an OpenID field.

After logging in, the module will change to include a Logout button. If you have permissions, the module will also include a field that allows you to "switch" to another user's login.

Tip: If the Login was removed from the left or right column, you can access the login page directly by using:
../tiki-login.php

Usage

You will see it listed at "Admin > Modules > Assign new module > Module Name (drop down)" (**tiki-admin_modules.php**).

You can assign this Module to a lateral column (See Module Admin page if needed).

The assigned module (with its default values) looks like this:

Log In

Username

Password

Remember me (for 1 week)

Parameters

Log-in box

[Go to the source code](#)

Parameters	Accepted Values	Description	Default	Since
<code>show_two_factor_auth</code>		Display two-factor authentication code input.		
<code>groups</code>		If this parameter is empty, all users are offered in the Switch user drop-down. If this parameter is set to a list of user groups, a user is only offered if it is member of at least one of these. A set of groups is specified with their identifiers (integers) separated by pipe characters (" ").		
<code>mode</code>		Display mode: module, header or popup. Leave empty for module mode		
<code>allowNone</code>	alpha	Allow user selection field to be empty (without any users selected) when enabled. (y/n)		
<code>input_size</code>	int	Number of characters for username and password input fields.		
<code>menu_id</code>	int	Menu to use as the dropdown in "popup" mode. Defaults to a built in menu with only "My Account" and "Logout"		
<code>forgot</code>	alpha	Show the "I forgot my password" link (y/n)		
<code>register</code>	alpha	Show the register link (y/n)		
<code>remember</code>	alpha	Show the "Remember me" checkbox (y/n)		
<code>show_user_avatar</code>	alpha	Show the user avatar when in popup mode (y/n)		
<code>show_user_name</code>	alpha	Show the user name when in popup mode (y/n)		
<code>start_session</code>	alpha	If the preference "silent_session" is enabled start the session when the login form is shown to avoid CSRF errors. (y/n)		
<code>register_page</code>	pagename	Page to redirect when the register link is clicked. If not given, the default register page is used.
