

Module permissions

New in [Tiki19](#) (and probably better in [Tiki20](#)), this module lists the permissions for current object.

It help site admins know which group has which permission on the current object, and how (ex.: object permissions vs category permissions vs global permissions)

Related Topics

Parameters

no parameters

EXAMPLE

This is a screenshot of the module in use at <https://dev.tiki.org/> (visible to logged in users only)

The screenshot shows a 'Permissions' page from the Tiki Wiki CMS Groupware. At the top, it says 'Permissions applied from: global level'. Below this, under the 'wiki' section, there is a list of permissions: admin_wiki, view, edit, upload_picture, rename, wiki_view_history, wiki_view_source, use_as_template, wiki_attach_files, wiki_view_attachments, wiki_view_comments, and view_backlink. Under the 'tiki' section, there is one permission: modify_object_categories. Under the 'comments' section, there are two permissions: read_comments and post_comments.

Module	Permission
wiki	admin_wiki
	view
	edit
	upload_picture
	rename
	wiki_view_history
	wiki_view_source
	use_as_template
	wiki_attach_files
	wiki_view_attachments
tiki	wiki_view_comments
	view_backlink
comments	modify_object_categories
	read_comments
post_comments
