

Module TrackerHelp

Introduced in Tiki6.

This module allows you to display the `fieldIds` of a tracker. Useful when adding TRACKER plugins.

Parameters

Display the fields of a tracker (name and identifier)

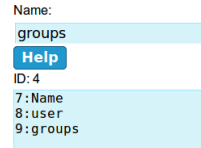

Go to the source code

Preferences required: feature_trackers

Parameters	Accepted Values	Description	Default	Since
height	int	Number of lines		
cols	int	Number of characters		

Example:

Tracker Help

Since Tiki7

A button allows to copy in a Pretty Tracker format all the fields in the current textarea of an edited wiki page.
