

Module user_pages

This module shows a clickable list of wiki pages where the logged in user was the last person to modify them. If a page is modified by someone else, it no longer appears on this list. Clicking on a page name takes you directly to that page.

My Pages	
1)	HomePage
2)	Reptiles
3)	Mammals

Parameters

Displays to registered users the specified number of wiki pages which they were the last to edit.
