

Must Reads

New feature added in [Tiki 14.0](#).

This is a [stub](#). In the meantime, you can see <https://dev.tiki.org/Must+Reads+Feature>

This feature is based on Trackers, and it creates a Tracker called "Must Read".

The screenshot shows the 'Tracker Fields: Must Read' configuration page. It features a table with columns for ID, Name, Type, List, Title, Search, Public, Mandatory, and Actions. The table lists five fields: 'Subject' (Text Field), 'Message' (Text Area), 'Deadline' (Date and Time (Date Picker)), 'Related Wiki Page' (Relations), and 'Created By' (User Selector). The 'Message' field is highlighted with a mouse cursor. Below the table is a 'Save All' button and a 'Go' button.
