Shopping Cart Order Item Profile

The pagename on your Tiki for this profile cannot contain spaces

This is used for the advanced Shopping Cart feature: Record orders in trackers.

To use it on your Tiki, you will need to change:

- the tracker ID
- the field IDs
- $OrderProfile:new_order to $WhateverTheOrderProfilePagenameIs:new_order

Make sure that proper Permissions are set on the page so that it does not get edited by non-admins.

YAML

objects: - type: tracker_item ref: new_order_item data: tracker: 5 status: pending values: - [20, $OrderProfile:new_order] - [21, $profilerequest:product$0$] - [22, $profilerequest:price$0.00$] - [23, $profilerequest:quantity$0$] - [40, $profilerequest:user$admin$] - [52, $profilerequest:eventcode$0$] - [158, $profilerequest:eventstart0] - [159, $profilerequest:eventend$0$] - [216, $profilerequest:price$0.00$] - [227, $profilerequest:inputedprice0.00] - [228, $profilerequest:parentcode0]
