Sessions tab

Overview

Use this tab to configure the Tiki options tha may affect your overall performance.

To Access

From the Performance Admin Panel page, click the **Sessions** tab.

Note

Changing settings on this tab will automatically log you out of your Tiki (after saving the preference).

Option	Description	Default
Silent session	Do not automatically start sessions. 👆 *Users will only have a session if they log in. Anonymous users will not have features like Switch Language or Switch Theme (which require a session)* ⚠ *Can cause problems when combined with cookie consent and JavaScript-disabled browsers.* 🧪	Disabled
Cache-control header (no session)	Custom HTTP header to use when no session is active	None
