## PARAMETERS

Display posts from a site blog

*Introduced in Tiki 1. Required parameters are in **bold**.*

[Go to the source code](#)

*Preferences required:* `feature_blogs`, `wikiplugin_bloglist`

## Parameters

---

**Accepted Values**

---

**Description**

<b>Default</b>	<b>Since</b>
----------------	--------------

**Id**

author

dateEnd

Items

any string except for HTML and PHP tags

date

digits

The ID number of the blog on the site to list posts from. More than one blog can be provided, separated by colon. Example: 1:5. Limitation: if more than one blog is provided, the private posts (drafts) are not shown.

Only display posts created by this user (all posts listed by default)

Latest date to select posts from. ()

Maximum number of entries to list (no maximum set by default)

1

3.5

3.5

3.0

simpleList

dateStart

charCount

containerClass

ellipsis

date

digits

(blank)

y

n

Show simple list of date, title and author (default) or formatted list of blog posts

Earliest date to select posts from. (`YYYY-MM-DD`)

Number of characters to display if not a simple list (defaults to all)

CSS Class to add to the container `DIV.article`.  
(Default=`wikiplugin_bloglist`)

If not a simple list and Character Count is non-zero, then marking this as yes will put ellipsis (...) at end of text (default).

y	3.5
	3.5
	12.0
wikiplugin_bloglist	3.5
y	12.0

---

If not a simple list and Character Count is non-zero, then marking this as yes will put a "More" link to the full entry (default).

If not a simple list, marking this as no will prevent the "edit" and "print" type icons from displaying (default is to show the icons)

If the blog has "Use post excerpt" enabled then use excerpts where available (default)

If not a simple list and Character Count is non-zero, then marking this as yes will break on word boundaries only.
