Plugin Copyright

This wiki plugin inserts a copyright notice based on the copyright property for the page.

Parameters

Insert copyright notices
Introduced in Tiki 1.
Go to the source code
Preferences required: wiki_feature_copyrights, wikiplugin_copyright

Parameters
(body of plugin) **-** Pattern for display of the copyright information. May contain `~title~`, `~year~`, `~authors~` and `~holder~`.
no parameters

Requirements

Before the plugin can work, you'll need to:

1. Go to *Control Panels > Features > Experimental (tab)* and check *Copyright* to turn on the copyright feature

2. Go to *Control Panels > Copyright* and check *Wiki* or whichever feature you want to display the copyright for

3. For the page you want to display the copyright for, click on *Edit* to edit the page and then complete the copyright information (title, year, authors) - this is under the *Properties* tab starting with version 4. See Copyright for more information.

Once above is done, entering `~title~`, `~year~`, or `~authors` in the body of the plugin will cause those copyright element for the page to display. For example, `~title~` will correspond to the title you entered in the 3rd step above, etc.

Example

Let's assume that you've entered the following copyright information for a page:
Title: Tikiwiki Documentation
Year: 2010
Authors: Tikiwiki community
Then using this code on that page:

{COPYRIGHT()}~title~ is copyrighted ~year~ by the ~authors~{COPYRIGHT}

Would produce:

Tikiwiki Documentation is copyrighted 2010 by the Tikiwiki community
Edit copyrights for HomePage

×
ⓘ Note

The second line allowing the user to edit copyright information will only show if the user has permission to edit copyrights (tiki_p_edit_rights is set to y).
