Plugin Draw

New in Tiki8 (and backported to 7.1).

Keep in mind that PluginDraw has been superseded by the new and more versatile/powerful PluginDiagram, introduced in Tiki20, which can also import and export drawings in **.svg** files.

Embed a drawing in a wiki page. See Draw for more information.

Parameters

Embed a drawing in a page

Introduced in Tiki 7.1.

Go to the source code

Preferences required: feature_draw, wikiplugin_draw

Parameters	Accepted Values	Description	Default	Since
`archive`	(blank) y n	The latest revision of file is automatically shown, by setting archive to Yes (`y`), it bypasses this check and shows the archive rather than the latest revision	n	8.0
`height`		Height in pixels or percentage. Default value is complete drawing height.	Image height	7.1
`width`		Width in pixels or percentage. Default value is page width, for example, `200px` or `100%`	Image width	7.1
`id`		Internal ID of the file ID		7.1

Example

This code:

{draw id="910"}

Would produce:
