

Plugin Fancy List

Use this [wiki plugin](#), introduced in [Tiki3](#), to produce a fancy looking numbered list.

PARAMETERS

Create a formatted numbered list

Introduced in Tiki 3.

[Go to the source code](#)

Preferences required: wikipugin_fancylist

Parameters	Accepted Values
(body of plugin)	
<code>class</code>	text
<code>div</code>	(blank)
	1
	0

Description

One item per line starting with anything followed by ")".

CSS class for the fancylist

Use the HTML div tag instead of the HTML ordered list tag (ol)

Default	Since
---------	-------

	3.0
--	-----

	3.0
--	-----

EXAMPLE

In this example, additional formatting is applied to the items in the list: the double single quotes (`" "`) to produce italics, and the two underscores before and after the words (`__`) to make the font bold. See [Wiki Syntax](#) for more information on text formatting.

This code,

```
{FANCYLIST()} "__Antiquity__" "__Middle Ages__" "__Renaissance__" "__Age of Enlightenment__" "__Romantic Era__" "__20th Century__" "__Present Day__" {FANCYLIST}
```

Would produce:

1. ***Antiquity***
2. ***Middle Ages***
3. ***Renaissance***
4. ***Age of Enlightenment***
5. ***Romantic Era***
6. ***20th Century***

7. Present Day
