

# Plugin Files

Use this wiki plugin, introduced in Tiki3, to display a list of files like in a file gallery listing. You can also create a link to a slideshow of images in a file gallery.

The files can be identified by their:

- ID
- gallery
- category
- gallery and category

## Requirements

Regarding permissions:

- The file gallery must be visible by the user in order for the file to be listed or displayed
- A category with a permission on a file has no effect

# Parameters

List files by ID, gallery or category, or show a slideshow of image files

*Introduced in Tiki 3.*

### ⓘ Additional notes

- If you give only `categId`, all the files that are in a gallery with this category and all the files of this category (after Tiki version 2) will be returned.
  - If you give only `galleryId`, all the files of this gallery will be returned
  - If you give `galleryId` and `categId`, all the files of the gallery that have this category will be returned
  - The fields that are displayed are those specified in one of the galleries
  - If you specify `title`, you will see this text as title instead of the category name or the gallery name as title
