

# Plugin Mail

*Introduced in Tiki5*

This wiki plugin allows users to directly mail other users or groups. This plugin can be placed in a wiki page, but functions like the message system in MyAccount.

# Parameters

Mail other users or groups

*Introduced in Tiki 3. Required parameters are in **bold**.*

[Go to the source code](#)

*Preferences required:* `wikiplugin_mail`

# Example

Send to users:

admin  
andre  
don  
dona  
sgrevera

Andrew  
Grev  
System Administrator  
William  
W

Send to:

Send to groups:

Ac  
Ac  
Aca  
Aca  
Admins  
Editors  
Eliza

Subject:

Message:

Send Mail

Choose between a drop down of user logins, user real names, or groups names, or direct input of emails. The groups list can be limited to the groups that include a specific group. The mail will be sent as a unique email from the webserver but the email address of the sender will appear in the "from:" address.
