Parameters

Display the modules assigned to a zone

*Introduced in Tiki 11. Required parameters are in **bold**.*

Go to the source code

Preferences required: `wikiplugin_modulelist`

Parameters	Accepted Values	Description	Default	Since
zone	(blank) top topbar pagetop left right pagebottom bottom	The name of the module zone to include. Can be a custom zone name.		11.0

Example

This syntax:

```
{modulelist zone="topbar"}
```

Produces on this site:

Tip

*Note this shows the menu bar at the top of the page since that is a module in the **topbar** zone.*
