

# Plugin Object Hits

Use this wiki plugin to display the number of hits for a wiki page, article, image gallery, file gallery and individual images or files in a gallery. The total number of hits can be displayed or the number of hits over the past x number of days.

## Parameters

Display the number of hits for certain objects

*Introduced in Tiki 1.*

[Go to the source code](#)

*Preferences required:* `wikiplugin_objecthits`

Parameters	Accepted Values	Description	Default	Since
<code>days</code>	digits	Show the number of hits over the past number of days indicated. Default is to show all hits.	0	1
<code>since</code>	text	Date since the hits are collected in a format supported by strtotime		10.0
<code>type</code>	alpha	Object type, such as wiki, file gallery, file, article, etc. Default is <code>wiki</code> .	wiki	1
<code>object</code>	text	For a wiki page, the page name, for other object types: ID number + ? + object title		1

×

### Note about file galleries

The plugin works differently for file galleries than described above:

- Prior to version 3.0
  - The ID number that will work in the *object* parameter may be different than the actual ID number for a file gallery (sometimes it's "-1"). You would need to look in the `tiki_stats` MySQL database table on the server where TikiWiki is installed to see what number to use.

- With version 3.0
  - Only the hits for the top level File Galleries can be displayed, and this is done by setting the *object* parameter to "0?" and the *type* parameter to "file gallery" (both without the quotes). The result is essentially the number of hits for the List Galleries page.

# Examples

*This code:*

**Example with no parameters set**  
{objecthits}

*Would produce on this site (total hits for this page):*

10979

*This code:*

**Another wiki page and days used**  
{objecthits object="Documentation" days="30"}

*Would produce on this site (hits on the Documentation page - home page for this site - for the past 30 days):*

274021

*This code:*

**Hits for an article**  
{objecthits object="19?News from doc.tw.o!"  
type="article"}

*Would produce on this site (total hits on article ID 19, titled News from doc.tw.o!):*

5876
