

Plugin ShareThis

Introduced in Tiki3

Use this [wiki plugin](#) to place a ShareThis button (from www.sharethis.com) on the page. Users can click on the button and select from a number of social networking services to share the page with their network. A ShareThis account is not necessary.

PARAMETERS

Add a ShareThis button

Introduced in Tiki 3.

[Go to the source code](#)

Preferences required: `wikiplugin_sharethis`

Parameters

Accepted Values

`buttontext`

text

`headertitle`

text

Description

Custom link text for the button.

Optional header title text for the widget.

Default	Since

Enter pipe-separated list of services, e.g.,

`email|facebook|twitter|sharethis.`

A value of `y` (Yes) will cause the button icon to rotate every 3 seconds between a few icons, cycling through twice before stopping.

Allow embedded elements (like flash) to be seen while iframe is loading.

Input a list of post services (like

`Facebook|Myspace|Digg`, etc.) separated by a `|` to

customize the services that are shown in the opening panel of the widget.

email|sms

separator: |

Set whether the widget will show in a popup window.

By default, `email`, `aim` and `sms` are available. Input one or two of the services separated by a `|` to limit the choice of send services.

📌 Other Usage Tips

- A ShareThis account is not necessary for this plugin to work properly.
- Personalized information from the user's ShareThis profile will appear in the widget if the

user is signed into ShareThis, either through their website or through the widget.

- If the plugin is used more than once on a page, all instances will be the same as the first one on the page.
- May not work within a {DIV} or {SPLIT} plugin (this is an issue for any plugin that produces Javascript).

EXAMPLE

This code:

```
{sharethis rotateimage="y" embed="true" buttontext="ShareThat" headertitle="Share this page!" headerbg="333333" headertxtcolor="e6d46e"}
```

Would produce this:
