Plugin ShareThis

Introduced in Tiki3

Use this wiki plugin to place a ShareThis button (from www.sharethis.com) on the page. Users can click on the button and select from a number of social networking services to share the page with their network. A ShareThis account is not necessary.

Parameters

Add a ShareThis button
Introduced in Tiki 3.
Go to the source code
Preferences required: wikiplugin_sharethis

Parameters	Accepted Values	Description	Default	Since
`buttontext`	text	Custom link text for the button.		3.2
`headertitle`	text	Optional header title text for the widget.		3.2
`style`	(blank) horizontal vertical rotate	Set button style.		5.0
`headerbg`	text	HTML color code (not color name) for the background color for the header if an optional header title is used.		3.0
`headertxtcolor`	text	HTML color code (not color name) for the header text if an optional header title is used.		3.2
`linkfg`	text	HTML color code (not color name) for the link text for all send and post services shown in the widget		3.0
`multiple`	word *separator:* `|`	Enter pipe-separated list of services, e.g., `email|facebook|twitter|sharethis`.		5.0
`rotateimage`	(blank) y n	A value of `y` (Yes) will cause the button icon to rotate every 3 seconds between a few icons, cycling through twice before stopping.		3.2
`embed`	(blank) (blank) true	Allow embedded elements (like flash) to be seen while iframe is loading.		3.0
`postfirst`	word *separator:* `|`	Input a list of post services (like `Facebook|Myspace|Digg`, etc.) separated by a `|` to customize the services that are shown in the opening panel of the widget.		3.2

popup	(blank)	Set whether the widget will show in a popup window.	3.0
	(blank)		
	true		
sendsvcs	(blank)	By default, `email`, `aim` and `sms` are available. Input one or two of the services separated by a `|` to limit the choice of send services.	3.2
	aim		
	aim|email		
	aim|sms		
	email		
	email|sms		
	separator: `|`

ℹ Other Usage Tips

- A ShareThis account is not necessary for this plugin to work properly.
- Personalized information from the user's ShareThis profile will appear in the widget if the user is signed into ShareThis, either through their website or through the widget.
- If the plugin is used more than once on a page, all instances will be the same as the first one on the page.
- May not work within a {DIV} or {SPLIT} plugin (this is an issue for any plugin that produces Javascript).

Example

This code:

{sharethis rotateimage="y" embed="true" buttontext="ShareThat" headertitle="Share this page!"

headerbg="333333" headertxtcolor="e6d46e"}

Would produce this:
