🗨️ Comment

The same 10 pages are listed here as in the first example, but here the list is a mix of page descriptions and page names because the parameter is set to list page descriptions but page names are still used for those pages without descriptions.

Related pages

- [PluginListPages](#) - for more refined searches
- [PluginTitleSearch](#) - a similar plugin, but this one produces a table showing page hits and the user who last edited the page
