

Introduction

Slideshow has been upgraded in Tiki19 and Plugin SlideShowSlide is a part of the upgrade.

The plugin SlideShowSlide is used to customize any individual slides in a slideshow. For example if you want to have a different background of a slide from the global settings then you will use Plugin SlideShowSlide.

The screenshot shows the configuration window for the SlideShowSlide plugin. It contains several sections for customizing slide settings:

- Slide Background color:** A text input field for setting the background color for the slide.
- Slide Text Color:** A text input field for setting the text color for the slide.
- Plugin Background Image:** A text input field for the URL of the background image to use in your slideshows, with a note that it must be a valid URL.
- Plugin Background Size:** A text input field for the size of the background image, with a note that it should be in pixels (e.g., "1000x1000") and that currently only powers are supported.
- Plugin Background Repeat:** A text input field for the number of pixels to move the pattern background per slide, with a note that it should be an integer and that it is disabled when set to auto.
- Plugin Background Video:** A text input field for the URL of a video to download from YouTube, with a note that it is automatically played in full size when behind the slide.

1.2. Parameters

Advance plugin to add slide in slideshow with different background colors, background video, transition and other settings.

Introduced in Tiki 19.

[Go to the source code](#)

Preferences required: `wikiplugin_slideshow`, `feature_slideshow`

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Enter content of slide		
<code>backgroundVideoUrl</code>		Automatically plays a full size video behind the slide		19.0
<code>parallaxBackgroundHorizontal</code>		Number of pixels to move the parallax background per slide, Calculated automatically unless specified. Set to 0 to disable movement along an axis		19.0
<code>parallaxBackgroundSize</code>		syntax, e.g. "2100px 900px" - currently only pixels are supported (don't use % or auto)		19.0
<code>parallaxBackgroundVertical</code>				19.0
<code>bgColor</code>		Set background color for slide.		19.0
<code>textColor</code>		Set Text color for slide.		19.0
<code>backgroundTransition</code>	none fade slide convex concave zoom	Transition style for full page slide backgrounds	fade	19.0
<code>videoLoop</code>	n y	Flags if the background video played in loop	y	19.0
<code>videoMuted</code>	n y	Flags if the audio should be muted for background video	y	19.0
<code>backgroundUrl</code>		URL of the background image to use in your slideshow, overrides <code>backgroundcolor</code>		19.0

transitionIn	none fade slide convex concave zoom	Select entry transition effect for slide	19.0
transitionOut	none fade slide convex concave zoom	Select exit transition effect for slide	19.0
transitionSpeed	(blank) fast slow	Transition Speed	19.0

Sample

It should be used to enclose the content of a slide.

```
{slideshow theme="simple" transition="zoom" transitionSpeed="default" backgroundTransition="none"
controls="y" controlsLayout="bottom-right" controlsBackArrows="faded" progress="y" slideNumber="y"
fragments="n" fragmentClass="grow" fragmentHighlightColor="none" autoSlideStoppable="y" alignImage="n"}
{SLIDESHOWSLIDE(bgColor="#fff" textColor="blue" videoMuted="n" videoLoop="n" transitionIn="none"
transitionOut="none" backgroundTransition="none")} !!Slide one {SLIDESHOWSLIDE}
{SLIDESHOWSLIDE(bgColor="#444" textColor="red" videoMuted="n" videoLoop="n" transitionIn="none"
transitionOut="none" backgroundTransition="none")} !!Slide two {SLIDESHOWSLIDE}
{SLIDESHOWSLIDE(bgColor="#000" textColor="#fff" videoMuted="n" videoLoop="n" transitionIn="none"
transitionOut="none" backgroundTransition="none")} !!Slide three {SLIDESHOWSLIDE}
```
