

Plugin Snarf

Use this [wiki plugin](#) to include the body (HTML) text at the URL given in the `url` argument. It is similar to [Integrator](#).

PARAMETERS

Display the contents of another web page
*Introduced in Tiki 1. Required parameters are in **bold**.*

[Go to the source code](#)

Preferences required: wikiplugin_snarf

Parameters	Accepted Values
------------	-----------------

<code>url</code>	url
<code>cache</code>	int
<code>colors</code>	text

Description

Full URL to the page to include.

Cache time in minutes. Default is to use site preference,
Set to for no cache.

Syntax highlighting to use for code snippets (Plugin
Code is used for this)

Default	Since

Arbitrary [regex](#) replacement can be done on this content using `regex` and `regexres` , which are used as the first and second arguments to `preg_replace` PHP function, respectively, after pulling out just the `<body>` data.

EXAMPLES

```
{SNARF (url="http://www.livejournal.com/users/rlpowell/2418.html" regex="/.*<!-- Content ->.*?<td>(.*?)</td>.*?</div>(.*?)<hr.*?<!-- \Content -->.*?/s" regexres="<p>$1</p>$2")}[http://www.livejournal.com/users/rlpowell/2418.html] {SNARF}
```

To include the content of a page of another Tiki installation you can use the following syntax:

```
{snarf url="http://my.foo.bar/tiki-index_raw_raw.php?page=ExamplePage" wrap="1" ishtml="1" cache="20"}
```

 Note

Do NOT type: `"/.../tiki-index_raw.php?page=..."` BUT `"/.../tiki-index_raw_raw.php?page=..."`

INCLUDE TIKI.ORG FOOTER PAGE

```
{snarf url="https://tiki.org/tiki-index_raw_raw.php?page=Shared_t_o_footer&clean" ishtml=1}
```

Produces:

(currently output is "broken" in Tiki 20.x on this site )
