

# Plugin Swiper

Plugin Swiper (introduced in Tiki19) is used to create a Slider/Swiper in any Tiki page using a wiki-plugin syntax shortcode. You can create multiple types of sliders and can place them in different locations on a page such as above header or inside the content body. It is mobile friendly and works great on handheld devices. Plugin Swiper is based on the Swiper, the most modern OpenSource mobile touch slider.

## **Custom Slide Code Explanation**

Enter custom slides data separated by using "|". Wiki Syntax / HTML supported in slide text, to include wiki page in slide text use PluginInclude.

### **Example Custom Slide Code**

```
{SWIPER()} title:Slide 1 title; text:HTML/Wiki Syntax Supported Slide 1 text; image:Slide Image URL;  
bgcolor:#colorcode; color: #color code for text {SWIPER}
```

#### **Tip**

To build an impressive image slide we must resize or choose images of the same size. Images having different sizes and dimensions will not look appropriate in the slider.

## **1.3. Slider Placement on a Page**

Swiper Plugin has the option to choose the placement of the slider at the following three locations

1. In the body (where ever in a page body you place the slider)
2. Above top bar / Top of the page (Above your page logo header)
3. Above content page / under top bar (Above the page body but under the logo header)

# 1. Examples

Following are some swiper slider examples.

# 1.1. Basic Slider Images

Following slider is built using Tiki File Galleries file id and a transition effect.

# Chat & Video Conferencing

# Web & Intranet

Example Code

```
{swiper fields="1472,1471,1470,1469,1468,4467,1466,1465" effect="flip" navigation="y" displayThumbnails="n" loop="y" autoPlay="y" autoHeight="n" slidesPerColumnFill="column" centeredSlides="n" slideToClickedSlide="n" freeMode="n" preloadImages="y" updateOnImagesReady="y"}
```

## 1.2. Slide with Slide transition & slide thumbnail navigation

Following slide is using the simple slide transition style with thumbnails display turned on.

# Custom Landing Pages with Plugin Layout
