PluginTikiManagerClone

This is a Wiki Plugin which embeds a button in a wiki page to perform a pre-configured clone or clone and upgrade action of an instance in Tiki Manager
This makes it simple for operations like:

- Clone from production to staging
- Clone from staging to production
- etc.
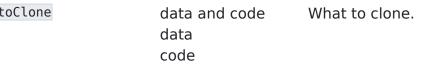

Like PluginTikiManagerUpdate, it requires the Tiki Manager Package

Parameters

Make on demand clone of an instance to another
Introduced in Tiki 25. Required parameters are in `bold`.
Go to the source code
Preferences required: feature_tiki_manager, wikiplugin_tikimanagerclone

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Button text(The text that will be displayed on the clone instance button).		
`branch`	string	Select branch.		25.0
`source`	string	Source instance(instance to clone) ID or name.		25.0
`target`	string	Destination instance(s) ID or name, comma separated in case of multiple instances.		25.0
`timeout`	int	Modify the default command execution timeout from 3600 seconds to a custom value	3600	25.0
`direct`	1 0	Prevent using the backup step and rsync source to target.	1	25.0
