Plugin Versions

Use this Wiki Plugin to divide a wiki page into separate "versions." Tiki will display a navigation box that allows users to display each version of the page. For example, you can use this plugin to separate a single wiki page into Release 1, Release 2, and Release 3 information.
Parameters

*Introduced in Tiki 1.*

*Preferences required:*

wikiplugin_versions

<table>
<thead>
<tr>
<th>Parameters</th>
<th>Accepted Values</th>
<th>Description</th>
<th>Default</th>
<th>Since</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
(body of plugin)

Block of text separated by - (version x)- markers. Text before the first marker is used by default.
Specifies version label to show when displaying the page for the first time. Default label is 'Default'
Display a navigation box that allows users to select a specific version to display.
Display the current version name as the title. No title shows when `nav="y"`; otherwise shows by default.
Notes

• If you use Wiki Config wiki page caching, this plugin may not render properly.
• The "versions" used for this plugin are different than the "versions" stored in the wiki page history.
Examples

To separate different versions of text use: 3 dashes (hyphens), followed by the version label in parenthesis, followed by at least 3 other dashes or hyphens. For example:

---(version 3)---
Basic example

This code:

```
{VERSIONS(nav="y" title="y")[
  This is the default text

  ---(version 3)-----------------------------
  This is version 3 info

  ---(version 2)-----------------------------
  This is version 2 info

  ---(version 1)-----------------------------
  This is version 1 info

  (VERSIONS)
]
```

Would produce:

This is the default text
More Examples

This code:

```
{VERSIONS(nav="n")}
This is the default text
---(version 3)-----------------------------
This is version 3 info
---(version 2)-----------------------------
This is version 2 info
---(version 1)-----------------------------
This is version 1 info
{VERSIONS}
```

Would produce:

Default
This is the default text

Sample usage in conjunction with PluginTracker and PluginTrackerList (these are Screenshots):

Default text: Formulari, using PluginTracker

Alternate version: Mostra les pre-inscripcions ja realitzades, using PluginTrackerList
Alias

- PluginVersion
