

# Content below to be refactored

[+]

the please see: [InstallGettingStarted](#)

optional extra steps:

---

activate features

---

point your browser to: <http://127.0.0.1/tiki/tiki-admin.php?page=features>

create a new user

---

Please proceed to:

<http://127.0.0.1/tiki/tiki-adminusers.php>

add user:

create a group

---

then proceed to:

<http://127.0.0.1/tiki/tiki-admingroups.php>

add a new group

Admin

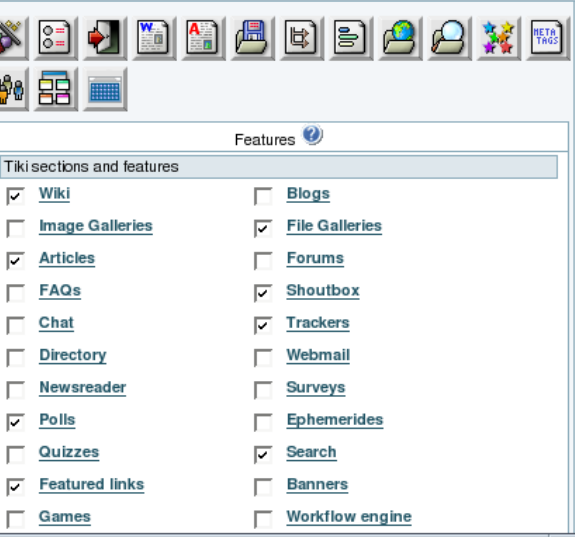

and include both registered and Anonymous. (this means you will have all their permissions plus yours)

point your browser to:

<http://127.0.0.1/tiki/tiki-assignpermission.php?group=admin>

see permission documentation for more info.

Now the easy part is over, and you are now in a world of options to Configure Tikiwiki.  
Use the Features Admin to enable Tiki features, then use the Admin page for each specific features.

Sample Features Admin page.
