Item view tab		Disabled
Days to display in the calendar	☰ Sunday | Monday | Tuesday | Wednesday | Thursday | Friday | Saturday	0, 1, 2, 3, 4, 5, 6
Treat calendar item descriptions as HTML	Use this if you use the WYSIWYG editor for calendars. This is to handle legacy data from Tiki pre 7.0.	Enabled
Enable watch events when you are the editor	Check this to receive email notifications of events you changed yourself.	Enabled
License for FullCalendar premium plugins	FullCalendar premium license. 👆 *For details on the premium license please check https://fullcalendar.io/license*	None
Holidays calendar	Choose a calendar to store non-working days which are used in date calculations involving working days.	None

Category

Option	Description	Default
Category	Site-wide content category system. Items of different types (wiki pages, articles, tracker items, etc.) can be categorized. Categories can have permissions to control content access	Enabled
Plugin Category	List categories and objects assigned to them	Enabled
Plugin Category Path	Show the full category path for a wiki page	Enabled
Plugin Category Orphans	List objects that are not categorized	Enabled
Inline plugin Category		Disabled
Inline plugin PluginCategoryTransition		Disabled
Inline plugin Category Orphans		Disabled
Inline plugin Category Path		Disabled
Category path	Show the category tree above the wiki page	Disabled
Exclude these category IDs	Category path won't appear for these category IDs.	None
Category path format	Alter how the category path will be rendered. ☰ Links to the category when the category is visible | Text label when the category is visible | Link when visible, text label otherwise | Always display the category path labels	Links to the category when ...
Sort categories case insensitively	Ignore case and accents when listing categories. Disable to use the "locale" sort settings.	Disabled
Show category objects	Show, at the bottom of the wiki page, objects in the same category	Disabled
Revision approval categories	List of category IDs for which revision approval is required.	None
"More Like This" algorithm for categories	☰ | Basic | Weighted	None
Minimum number of categories in common	☰ 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10	2 categories
List objects with most categories in common	No minimum is applied.	Enabled
Maximum number of "more like this" objects	The default maximum records setting for the site is used of this is set to 0.	0 objects
Category transition	Enables transitions for objects between different categories. Transitions will create a document workflow.	Disabled
Plugin PluginCategoryTransition	Display controls to trigger category transitions for any object.	Disabled

Option	Description	Default
Provides the current categories to Smarty templates	When enabled, the $objectCategoryIds variable is set to the identifiers of the categories of the object being viewed. This allows showing alternate content depending on the categories of the current object, but reduces performance.	Disabled
Categories to add as CSS classes to \<body>	Pages in selected categories will have a class with syntax like "cat_catname" added to the body tag.	None
Excluded categories	List of category IDs to exclude from the search index	None
Clear cache upon category change	A cache is used to avoid having to fetch all categories from the database every time; this clears the cache when an object is categorized to keep the count up to date. ⚠ *Can slow saving objects on sites with a lot of categories. You may need to manually clear caches to update category object counts.*	Enabled
Generate custom facets from categories	Comma-separated list of category IDs.	None
Areas	Binding categories and perspectives to each other 🧪	Disabled
Areas root category ID	ID of category whose child categories are bound to a perspective by areas	0
Category filter		Disabled
Category jail	Limits the visibility of objects to those in these category IDs. Used mainly for creating workspaces from perspectives. ✳ *This should only be set for perspectives, and not globally.*	None
Category defaults	Require certain categories to be present. If none of the categories in a given set is provided, assign a category by default. Use *7 to specify all the categories in the subtree of 7 + category 7. Can do only this for objectname matching the regex (Example: / RND_/ = name beginning by RND_)(Optional) Can do for wiki only (optional). Rename will only reassign the categories for wiki pages. 👆 *One per line, for example: 1,4,6,*7/4:/ RND_/:wiki page* 🧪	None
Automatically geocode items with this category	Automatically geocode items based on category name when categorized in the sub-categories of this category ID	None
Replace any existing geocode	When automatically geocoding items based on category name, replace existing geocode, if any	Disabled
Use approximate geocode location	When automatically geocoding items based on category name, use randomly approximated location instead of precise location	Disabled

Option	Description	Default
Synchronize multilingual categories	Make sure that the categories of the translations are synchronized when modified on any version. ⊟ None | Only those specified | All but those specified	None
Synchronized categories	List of categories affected by the multilingual synchronization. Depending on the parent feature, this list will be used as a white list (the only categories allowed) or as a black list (all categories allowed except those specified).	None
Workspace root category	ID of the root category containing all workspaces. ⚠ *This value is automatically managed and should not need to be modified manually.*	0
Default domain for non categorized content	The domain (hostname only) to be used when redirecting the user if he tries to read content that is not bound to the category/perspective configured for the current domain.	None
Limit wiki page categories to those under this category	If an error message indicates a mandatory category is required when editing a wiki page, set this option to "None". ⊟ None | All | Archived | Editorial Board Meeting | Files example | Keywords | Retired | Status | Status 3.In Progress | Templates | Versions | Versions 1.x | Versions 10.x | Versions 11.x | Versions 12.x | Versions 13.x | Versions 14.x | Versions 15.x | Versions 16.x | Versions 17.x | Versions 18.x | Versions 2.x | Versions 3.x | Versions 4.x | Versions 5.x | Versions 6.x | Versi...	None

Option	Description	Default
Limit blog categories to those under this category	If you get an error message indicating a mandatory category is required when editing a blog post, this is the option to blame. Set it to None. ≡ None | All | Archived | Editorial Board Meeting | Files example | Keywords | Retired | Status | Status 3.In Progress | Templates | Versions | Versions 1.x | Versions 10.x | Versions 11.x | Versions 12.x | Versions 13.x | Versions 14.x | Versions 15.x | Versions 16.x | Versions 17.x | Versions 18.x | Versions 2.x | Versions 3.x | Versions 4.x | Versions 5.x | Versions 6.x | Versi…	None
Use unified search in category admin	Use unified search to find objects to add to categories. This limits the types of objects available to those included in the unified index.	Disabled
Automatically select the theme-control category of the current theme when categorizing	When creating or editing an object, automatically select the category that matches the theme-control category of the current theme	Disabled
Parent category of theme control categories	Choose the parent category of categories used for theme control ≡ None | Archived (35) | Editorial Board Meeting (10) | Files example (13) | Keywords (12) | Retired (34) | Status (1) | 3.In Progress (4) | Templates (33) | Versions (14) | 1.x (15) | 10.x (24) | 11.x (25) | 12.x (26) | 13.x (27) | 14.x (28) | 15.x (29) | 16.x (30) | 17.x (31) | 18.x (32) | 2.x (16) | 3.x (17) | 4.x (18) | 5.x (19) | 6.x (20) | 7.x (21) | 8.x (22) | 9.x (23)	Disabled
Store session variable for current theme	Store a session variable for current theme so that it can be used for auto-selecting a category when categorizing	Disabled
Categorize tracker item	Enable the tracker item to be categorized in one or more categories under the specified main category.	Enabled

Option	Description	Default
Index Tracker Category names	Index the names and paths of category field values 👆 *Requires reindexing*	Enabled
Include category selector in forum list	Include a dropdown selector in the forum list to choose a category for the post.	Disabled
Forum post categories	Categories available in the category picker for forum posts.	None
Categories		Disabled
Categories path		Disabled
Show category object count	Show object count when browsing categories, complying with search and type filters ⚠ *Can slow the loading of the categories page on large sites.*	Enabled
Show category id's	Show object id's when browsing categories	Disabled
Show categories	For polls that are categorized, the category is displayed.	Disabled
Categorize structure pages together	Place new pages of a structure in the same category as the structure's root page	Disabled

Comments

Option	Description	Default
Comments moderation	Enables the admin or other authorized group member to validate comments before they are visible	Disabled
Comments locking	Comments can be closed (no comments, or no new comments)	Disabled
Add author name in From email header	Add the name of the comment author in the email header "From", making the email look like sent from "John Doe <noreply@example.com>"	Disabled
Allow logged-in users to post comments anonymously	This can be used to encourage honest feedback without self-censorship, such as in a forum for brainstorming or feedback for improvement.	Disabled
Use vote system for comments	Allow users with permission to vote on comments. 👆 *Permissions involved: vote_comments, wiki_view_comments, ratings_view_results*	Disabled
Archive comments	If a comment is archived, only admins can see it	Disabled
Allow comments to be edited by their author	Allow a comment to be modified by its author after posting it, for clarifications, correction of errors, etc.	Enabled

Option	Description	Default
Comment correction timeout	The time in minutes during which a comment can be modified by its author after posting it, for clarifications, correction of errors, etc.	90 minutes
Use Akismet to filter comments	Prevent comment spam by using the Akismet service to determine if the comment is spam. If comment moderation is enabled, Akismet will indicate if the comment is to be moderated or not. If there is no comment moderation, the comment will be rejected if considered to be spam.	Disabled
Show comments below items	Show comments for a tracker item below the item itself as in other trackers, instead of enclosed in a tab	Disabled
Akismet API Key	Key required for the Akismet comment spam prevention. 👆 *Obtain this key by registering your site at http://akismet.com*	None
Filter spam for registered users	Activate spam filtering for registered users as well. Useful if your site allows anyone to register without screening.	Disabled
Number of comments per page		25
Sort mode for comments	☰ Oldest first | Newest first	Oldest first
Limit indentation on thread reply	☰ Limit Indentation (to 5) | All indented	Limit Indentation (to 5)
Disable comment titles	Don't display the title input field on comments and their replies.	Enabled
Anchor links on headings	Cause a link icon to appear on hover over each heading, useful for sharing the URL to an exact location on a page.	Enabled
Parse wiki syntax in comments	Parse wiki syntax in comments in all sections apart from Forums Use "Accept wiki syntax" for forums in admin forums page	Enabled
Email field	Email field for comments (only for anonymous users).	Disabled
Website field	Website field for comments (only for anonymous users).	Disabled
Comment box	Size (height) of the comment text area.	6 rows
Inline comments	Contextual comments ⚗	Disabled
Inline comments using Apache Annotator	Use the Open/Apache Annotator JavaScript based library for managing inline comments as annotations. ⚗	Disabled
Show extra info	Show author and date on Open Annotator inline comments. ⚗	Enabled
Comments on articles	Users with permission can post or reply to comments. The comments will appear at the bottom of the page.	Disabled

Option	Description	Default
