

Forums - Forum listing

| Option | Description | Default |
|---|--|---------|
| Default order | | |
| Section order | | |
| Topics | | |
| Posts | | |
| Posts per day (PPD) | | |
| Last post | | |
| Visits | | |
| Description | | |
| Description length | | |
| Include category selector in forum list | Include a dropdown selector in the forum list to choose a category for the post. | |
| Forum post categories | Categories available in the category picker for forum posts. | |

Forums - General settings

| Option | Description | Default |
|---|--|---------|
| Forums | Threaded or flat discussions. | |
| Home forum (main forum) | | |
| Forum image file gallery | File gallery used to store images for forums | |
| Rankings | Users can see several charts or rankings about the page. | |
| Process inbound mail in cron job. | This prevent to process inbound mail when user is viewing a forum. This will require setting up a cron job running "php console.php forum:inbound-mail" command | |
| Accept wiki syntax | | |
| Strip wiki markup from outgoing forum emails | Convert outgoing emails from forum posts to plain text. | |
| Topic archiving | | |
| Quick jumps | | |
| Replies are empty | <i>If disabled, replies will quote the original post</i> | |
| Allows quoting in flat forums | Allows users to reply. | |
| Don't display forum thread titles | Titles of posts usually don't change because they are a direct reply to the parent post. This feature turns off the display of titles in edit forms and forum display. | |
| Do not start messages titles with 'Re:' | | |
| Require reply to have a title | Present an empty title input form and require it to be filled in before the forum post is submitted. | |
| First post of a thread can have an empty body | <i>Will be a thread title</i> | |
| Prevent Nesting of Quote wikipugins when replying | Strips quote plugin in reply in order to prevent nesting of quote plugins. | |
| Allow inbound email posts from anyone | Allow messages from non-users in the forums using incoming messages from any email address. | |
| Parse HTML in inbound email posts | Attempt to keep the formatting of HTML "rich text" emails if using WYSIWYG. <i>Experimental Has problems with some HTML emails, especially those with table-based layouts.</i> | |
| Uploaded filenames must match regex | | |

| Option | Description | Default |
|--|--|---------|
| Send moderation email | Send email to forum moderators when post is queued | |
| Approve link in moderation email | Include a link for forum moderators to approve queue from email | |
| Manage thread defaults per-forum | | |
| Display thread configuration bar | <i>Allows users to override the defaults</i> | |
| Keep settings for all forums during the user session | | |
| Display the thread configuration bar only when the number of posts exceeds | | |
| Number per page | | |
| Default style | | |
| Default sort mode | | |
| Display forum thread or forum post title in the search engine friendly URL | | |
| New email thread for each topic | If enabled each topic a forum will use it's own email thread, instead of all forum posts sharing the same one. | |
| Forum name search | <i>When listing forums</i> | |
| Forum content search | <i>When listing forums</i> | |
| Topic content search | | |
| Unified search for forums and file galleries | | |
| Index posts on forum section change. | Re-indexes forum posts to match the parent section when the section is changed | |

Tags

| Option | Description | Default |
|----------------|--|---------|
| Tags | Enables tags to be set on pages and other items for freeform categorization. | |
| Plugin Tagged | List similarly tagged objects | |
| Plugin Add Tag | Provide an input field for adding a tag to an object | |
| Show tag cloud | Show the full tag cloud in the list-tags screen. | |

| Option | Description | Default |
|----------------------------------|---|---------|
| Maximum number of tags in cloud | | |
| Show tags in middle column | On pages that have content tagged, this option enables the display of the tags at the top of those pages. Tags can be set, among other places, in the properties tab when editing a wiki page.. | |
| Tag Suggestions | Number of tags to show in tag suggestions | |
| Valid characters pattern | Click on the links below to set or clear a pattern to limit characters accepted in tags. <i>Useful to eliminate characters such as “,” which users can enter by mistake instead of a space.</i> | |
| Lowercase tags only | Convert uppercase characters in tags to lowercase, if this is a preferred style for making tags more user-friendly.. | |
| Multilingual tags | Permits translation management of tags | |
| "More Like This" algorithm | enables tagged material to offer a find potentially related content. Basic will present content where a minimum number of tags match the item or page being viewed. Weighted is the same, but items are presented in Weighted (highest value first) sort order. | |
| Minimum number of tags in common | The minimum number of matching tags required for an item to be presented in the "More Like This" feature. | |
| Ordering of tagged objects | Default sort mode for tagged items | |
| Preload random tag | A random tag will be selected on the tag search page (if no tag is pre-selected).. | |

General - Date and time

| Option | Description | Default |
|---------------------|---|---------|
| Time zone | Indicates the default time zone to use for the server. | |
| Displayed time zone | Use time zone set from user preferences, or the automatically detected time zone for anonymous (if browser allows). Site default is used as fallback. | |
| Long date format | Specify how Tiki displays the date (longer version) | |
| Short date format | Specify how Tiki displays the date (shorter version) | |

| Option | Description | Default |
|--------------------------------------|---|---------|
| Long time format | Specify how Tiki displays the time (longer version) | |
| Short time format | Specify how Tiki displays the time (shorter version) | |
| Short JavaScript date format | Used in the date picker fields | |
| Short JavaScript time format | Used in the datetime picker fields | |
| Fields display order | The order date field inputs should be listed in. | |
| Start year | Year to show first in dropdown lists. For example, use "-2" for the current year minus two, or "2010" for a specific year | |
| End year | Year to show last on dropdown lists. For example, use "+2" for the current year plus two, or "2016" for a specific year | |
| Select month in Date Picker | Users can select month in the Date Picker instead of seeing month as text. | |
| Select year in Date Picker | Users can select year in the Date Picker instead of seeing year as text. | |
| Use 12-hour clock for time selectors | Use the 12-hour clock (with AM and PM) in some edit screens to set the time for publishing new or edited blog posts, articles, etc. | |
| Skip date for same day | When displaying short date and time, skip date for today. Only time will be displayed. | |
| Query Timeago | jQuery plugin for fuzzy timestamps. | |
| Plugin Now | Show the current date and time | |
| Plugin Countdown | Display the time until or after a date and time | |
| Plugin Convene | Suggest meeting dates and times and vote to select one | |

General - General preferences

| Option | Description | Default |
|----------------------------|---|---------|
| Server domain name | The value that will be used by default as the server domain name of your Tiki site. <i>Leave this blank if you are not entirely sure what you are doing. If this value is incorrect or your DNS is not set up properly it will lock you out of your Tiki and require database or shell access to recover it.</i> | |
| Browser title | Visible label in the browser's title bar on all pages. Also appears in search engine results. | |
| Fallback for tiki base URL | The full URL to the Tiki base URL including protocol, domain and path (example: https://example.com/tiki/), used when the current URL can not be determined, example, when executing from the command line. | |

| Option | Description | Default |
|--|---|---------|
| Browser title position | Position of the browser title in the full browser bar relative to the current page's descriptor. | |
| Browser title display mode | When breadcrumbs are used, method to display the browser title. | |
| Sender email | Email address that will be used as the sender for outgoing emails. | |
| Sender full name | Real name that will be used as the sender for outgoing emails | |
| Default character set for sending mail | Specify the character encoding used by Tiki when sending mail notifications. | |
| Email newline character(s) | End-of-line (EOL) character used in outgoing emails | |
| Apply site styles to HTML emails | Add site CSS to all HTML formatted emails | |
| Mail sender | Specify if Tiki should use Sendmail(the PHP mail() function), SMTP or File (Debug) (to debug email sending by means of storing emails as files on disk at ./temp/Mail_yyyymmddhhmmss_randomstring.tmp) to send mail notifications. | |
| Amazon SES Key | | |
| Amazon SES Secret | | |
| Amazon SES Region | | |
| Amazon SES version | | |
| Elastic Email Username | | |
| Elastic Email Key | | |
| Mailgun Domain | | |
| Mailgun Key | | |
| Mailgun API Endpoint | | |
| Mandrill Key | | |
| Postage Key | | |
| Postmark Key | | |
| SendGrid Username | | |
| SendGrid Key | | |
| SparkPost Key | | |
| SMTP server | | |
| Authentication | Mail server authentication | |
| Username | | |

| Option | Description | Default |
|--|---|---------|
| Password | | |
| Port | | |
| Security | | |
| Verify HTTPS certificates of remote servers | When set to enforce, the server will fail to connect over HTTPS to a remote server that do not have a SSL certificate that is valid and can be verified against the local list of Certificate Authority (CA) | |
| Local server name | Name of the local server. Will be reported to SMTP relay on the HELO/EHLO line. | |
| Mail delivery | When set to Queue, messages will be stored in the database. Requires using the shell script <code>php console.php mail-queue:send</code> to be run for actual delivery. | |
| Catch-all email address | Tiki will send all emails to this email address instead of the target recipients. This will actually rewrite the recipient TO, CC and BCC email headers. | |
| Email footer | Text appended to outgoing emails. | |
| Text string used to customise mail templates | Text string used to customise mail templates and added as a pref reference in the appropriate mail tpl files | |
| Throttle newsletter send rate | Pause for a given amount of seconds before each batch to avoid overloading the mail server. | |
| Newsletter pause length | Number of seconds delay before each batch | |
| Newsletter batch size | Number of emails to send in each batch | |
| Allow sending newsletters through external clients | Generate mailto links using the recipients as the BCC list. <i>This will expose the list if email addresses to all users allowed to send newsletters.</i> | |
| PHP Error reporting level | Level of errors to be reported. Errors can be seen in a collapsible box at the bottom of the page, if any exist. | |
| PHP errors visible to admin only | PHP Errors will be shown to only the Admin user. <i>During site development, it's better to display errors to all users. However, in production settings, errors should only be displayed to administrators.</i> | |
| Include Smarty notices in the PHP error report | Tiki will display Smarty notices with the PHP error messages. <i>In most cases, Smarty notices can be safely ignored. However, they may be useful in the development process when unexpected issues occur.</i> | |
| Show generic error message | Show a generic error message for non admins users. The error is logged to the database. | |
| Generic error message | Message to display to non admin users when an error occurs. | |
| Log mail in Tiki logs | A line of type mail will be included in the System Log with the destination address and subject of each email sent. <i>May impact performance</i> | |

| Option | Description | Default |
|-----------------------------------|--|---------|
| Log SQL | All SQL queries will be registered in the database in the tiki_sql_query_logs table. <i>Do not enable this feature all the time. It can be very resource intensive and will impact performance.</i> | |
| Log queries using more than | Use to log only queries that exceed a specific amount of time. <i>May impact performance</i> | |
| Data Source Name (DSN) | DSN used for connect to the error tracking service. | |
| Sample rate | Sampling allows you to better manage the number of reported events, so you can tailor the volume of data needed. Use a value between 0 and 1. E.g.: 0.25 (will report 25% of the events) | |
| Track PHP errors | Enable integration with error tracking service(ex: Sentry, GlitchTip) for PHP. | |
| Track JavaScript errors | Enable integration with error tracking service(ex: Sentry, GlitchTip) for JavaScript. | |
| Enabled | Cron jobs can be triggered from a URL or with JavaScript. A token is required to run the cron job manually. | |
| How to trigger Web Cron | | |
| Run interval | The amount of time of each run | |
| Token | The token to use when running the cron manually | |
| Scheduler | Provides the ability to run tasks at a scheduled time. | |
| Delay scheduled time (minutes) | When calculating if the jobs should run, take the delay into consideration | |
| Allow shell command execution | Give the possibility to execute shell commands. | |
| Scheduler stalled after (minutes) | Set a scheduler to stall if the running time is long. Set 0 to disable stall detection. | |
| Notify on stalled schedulers | Send an email notification when a stalled scheduler is detected. | |
| Users to notify on stalled task | List of users/emails separated by comma to be notified when a scheduler task is set to stalled.Ex: admin,operations@example.com If empty, the email will be sent to all administrators. | |
| Self healing after (minutes) | Self healing resets a stalled scheduler automatically after the timeout set. 0 disables self healing | |
| Notify on healed schedulers | Send an email notification when a stalled scheduler is healed. | |
| Users to notify on healed task | List of users/emails separated by comma to be notified when a scheduler task is set to healed.Ex: admin,operations@example.com If empty, the email will be sent to all administrators. | |
| Number of logs to keep | 0 will keep all logs | |
| Headless Browser Integration Type | Type of headless browser integration to be used. | |
| Chrome Binary Path | This ensures that the ChromePHP library can locate and execute the Chrome browser for headless operations | |

General - General settings

| Option | Description | Default |
|---|---|---------|
| Temporary directory | Directory on your server, relative to your Tiki installation, for storing temporary files. Tiki must have full read and write access to this directory. | |
| Use proxy | Specify if this Tiki site requires a proxy to access the internet. If enabled, the proxy Host name (either with or without the http:// prefix), Port settings, Username, and Password can be specified. | |
| Proxy host name | Proxy host - without http:// or similar, just the host name | |
| Port | Proxy port | |
| Proxy username | | |
| Proxy password | | |
| HTTP lookup: skip framesets | When performing an HTTP request to an external source, verify if the result is a frameset and use heuristic to provide the real content. | |
| Load balancer | Activate this only if the server is behind a load balancer (or reverse proxy). This enables logging the IP of the user rather than the IP of the proxy server | |
| Tiki is behind a frontend-proxy/load-balancer that rewrites ports | Activate this only if the server is behind a frontend-proxy/load-balancer (or reverse proxy) that rewrites ports. This enables Tiki to use the HTTP_X_FORWARDED_PROTO parameter set by the proxy, to provide correct links. | |
| Access-Control-Allow-Origin | Domains allowed to make "CORS" (Cross-Origin Resource Sharing or Cross-Domain Ajax) requests from this server. <i>One URI per line, for example, "http://www.example.com" or "*" for any site</i> | |
| Use CURL for HTTP connections | Use CURL instead of sockets for server to server HTTP connections, when sockets are not available. | |
| Realtime Tiki | Use built-in websockets server within Tiki to enable realtime communication features of the app. See help page for more information on how to start the server. | |
| Realtime port | The port used to access this server; if not specified, port 8080 will be used <i>If not specified, port 8080 will be used</i> | |
| Path to the php binary | Path to the php command line binary to be used by tiki when calling command line programs | |
| Multi-domain | Enable domain names to be mapped to perspectives and simulate multiple domains hosted with the same Tiki installation. | |

| Option | Description | Default |
|---|---|---------|
| Switch domain when switching perspective | Important: Different domains have different login sessions and, even in the case of subdomains, an understanding of session cookies is needed to make it work | |
| Default domain for non categorized content | The domain (hostname only) to be used when redirecting the user if he tries to read content that is not bound to the category/perspective configured for the current domain. | |
| Multi-domain Configuration | Comma-separated values mapping the domain name to the perspective ID. <i>One domain per line with a comma separating it from the perspective ID. For example: tiki.org,1</i> | |
| Session storage location | Select where the session information should be stored. Memcache sessions require memcache to be configured. | |
| Session lifetime | Session lifetime <i>Expressed as minutes. This is the minimum time logged in. To be the exact time, adjustments must be made in .htaccess session.gc_probability and session.gc_divisor to 1. Be careful - changing the probability may affect server performance.</i> | |
| Session cookie name | Session cookie name used instead of the PHP default configuration | |
| Site terminal | Allows users to be directed to a specific perspective depending on the origin IP address. Can be used inside intranets to use different configurations for users depending on their departements or discriminate people in web contexts. Unspecified IPs will fall back to default behavior, including multi-domain handling. Manually selected perspectives take precedence over this. | |
| Site terminal configuration | Provides the mapping from subnets to perspective. <i>One per line. Network prefix in CIDR notation (address/mask size), separated by comma with the perspective ID. Example: 192.168.12.0/24,12</i> | |
| Contact us | A basic contact form a visitor can use to contact the site admin <i>You can use Trackers to create custom Contact Us forms.</i> | |
| Allow anonymous visitors to use the "Contact Us" feature. | Allow anonymous visitors to use the "Contact Us" feature. | |
| Display contact priority | Display contact priority option | |
| Contact user | User to contact | |
| Stats | Record basic statistics about major Tiki features (number of wiki pages, size of file galleries, etc.) | |
| Referrer stats | Record domain name of sites that send visitors to this Tiki. | |
| Count admin pageviews | Include pageviews by Admin when reporting stats. | |
| Terms and Conditions | Automatically present a terms of use page to be accepted by users accessing the site. | |
| Terms of Use page name | Wiki page for Terms of Use content. The page may be translated using the multilingual feature. | |

| Option | Description | Default |
|-------------|---|---------|
| Minimum age | When presenting the terms of use, request age. <i>0 to ignore age validation</i> | |
| Help system | Activates links to Tiki documentation. You can specify a Help URL that contains customized help pages. By default, the Help system uses http://doc.tiki.org/ | |
| Help URL | The default help system may not be complete. You can contribute to the Tiki documentation, which is a community-edited wiki. | |

General - Navigation

| Option | Description | Default |
|---|--|---------|
| SmartMenus | Add "SmartMenus" to Bootstrap menus. See smartmenus.org for more. | |
| Menu user levels | Enables control of the per-group visibility of menu options | |
| Featured links | A simple menu system to display external web pages in a new browser tab or an iframe within the site, etc. | |
| Use folder icons for menu section (parent) items | When a menu isn't set as a Bootstrap or CSS menu, use folder icons for menu section items (rather than plus/minus signs). | |
| Menu icons | Allows icons to be defined for menu entries | |
| Default path for the icons | | |
| Edit menu icon | Adds an icon on the navbar to edit menu entries | |
| Use group homepages | Users can be directed to different pages upon logging in, depending on their default group. | |
| Go to the group homepage only if logging in from the default homepage | | |
| Use the top page of a Tiki feature as the homepage | Select the Tiki feature to provide the site homepage. Only enabled features are listed. | |
| Use custom homepage | Use the top page of a Tiki feature or another homepage <i>This option will override the Use Tiki feature as homepage setting.</i> | |
| Homepage URL | | |
| Homepage Browser title | Customize Browser title for the custom homepage | |

| Option | Description | Default |
|---|--|---------|
| Wiki homepage | The default home page of the wiki when no other page is specified. The page will be created if it does not already exist. | |
| Home blog (main blog) | | |
| Home forum (main forum) | | |
| Home file gallery (main file gallery) | Select the default file gallery | |
| Domain prefix handling | Strip or automatically add the "www." prefix on domain names to standardize URLs. | |
| Domain redirects | When the site is accessed through specific domain names, redirect to an alternate domain preserving the URL. Useful for domain name transitions, like tikiwiki.org to tiki.org. <i>One entry per line, with each entry a comma-separated list: old domain, new domain</i> | |
| Redirect on error | On an error, refresh to the homepage as specified on the Admin General page. | |
| Redirect to similar wiki page | If a requested page doesn't exist, redirect to a similarly named page | |
| On permission denied, display login module | If an anonymous visitor attempts to access a page for which permission is not granted, Tiki will automatically display the Log-in module. Alternatively, use the Send to URL field to display a specific page (relative to your Tiki installation) instead. | |
| Send to URL | URL to redirect to on "permission denied" | |
| The URL that the anonymous user is redirected to when a page is not found | | |
| URL the user is redirected to after account validation | The default page a Registered user sees after account validation is "tiki-information.php?msg=Account validated successfully". <i>Default: tiki-information.php?msg=Account validated successfully.</i> | |
| Alternate registration page | Enter URL of a custom registration page. Tiki will automatically redirect default registration page (tiki-register.php) to this page. | |
| URL Suffix Cleaner | When the requested page does not exist, tests removing 1 or 2 of the last characters from the URL to see if it gets an existing page. | |
| URL to go to when clicking on a username | URL to go to when clicking on a username. Default: tiki-user_information.php?userId= <i>(Use for login name and No value assigned for userId)</i> | |
| Sitemap protocol | Allows generating site maps based on the Sitemap protocol, in the form of XML documents. Mostly used to facilitate indexation of a site by web search engines. | |

| Option | Description | Default |
|--|---|---------|
| Close site | Use this setting to "close" the Tiki site (such as for maintenance). Users attempting to access the site will see only a log-in form. Only users with specific permission will be allowed to log in. Use the Message to display to specify the message that visitors will see when attempting to access your site. | |
| Title | | |
| Message | | |
| Close site when server load is above the threshold | Use this option to "close" the Tiki site when the server load exceeds a specific threshold. Only users with specific permission will be allowed to log in. Use "Maximum average server load threshold in the last minute" to define the maximum server load. Use the "Message to display" to specify the message that visitors will see when attempting to access the site. | |
| Maximum average server load threshold in the last minute | | |
| Site Busy Title | | |
| Site Busy Message | | |
| Breadcrumbs | Indicates the navigation path through parent pages to the current page. <i>Unmaintained feature</i> | |
| Prefix breadcrumbs with "Location : " | Place the term "Location:" in the breadcrumbs. | |
| Site location bar | | |
| Larger font | | |
| Use page description | | |
| Namespace | Enable namespaces feature for wiki pages. | |
| Namespace separator | Select the character, symbol, or text to use as the namespace separator. | |
| Hide namespace indicator in structure path | Hide namespace indicator in structure path. <i>Useful to avoid conflicts with C++ scope operators or default namespace separator</i> | |
| Center text using instead of | | |
| Page name display stripper | The character(s) to use as a delimiter in the page name. The portion of the name after the character(s) will not be displayed. If the page name display stripper conflicts with the namespace separator, the namespace is used and the page name display is not stripped. | |

Internationalization (i18n)

| Option | Description | Default |
|--|--|---------|
| Default language | The site language is used when no other language is specified by the user. | |
| Default admin language | The site language is used in admin section when no other language is specified by the user. | |
| Wiki link format | Level of special characters acceptable in wiki links for page names. For example: Page éâî <i>"Strict" includes only basic characters such as a-z and 0-9. A site that uses accented or special characters in page names should not use "strict".</i> | |
| Default character set for sending mail | Specify the character encoding used by Tiki when sending mail notifications. | |
| Multilingual | Enables internationalization features and multilingual support at the site. | |
| Detect browser language | Look up the user's preferred language through browser preferences. | |
| Show pages in user's preferred language | When accessing a page which has an equivalent in the user's preferred language, favor the translated page. Based on the user's Tiki preferences. | |
| Users can choose the language of their interface | Allow users to change the language of the menus and labels. | |
| Restrict supported languages | Limit the languages made available on the site. <i>Use Ctrl+Click to select multiple languages.</i> | |
| Available languages | By default, all languages supported by Tiki are available on multilingual sites. This option allows limiting the languages to a subset. | |
| Language inclusion threshold | When the number of languages is restricted on the site, and is below this number, all languages will be added to the preferred language list, even if unspecified by the user. However, priority will be given to the specified languages. | |
| Display available translations | Display list of available languages and offer to switch languages or translate. This appears on wiki pages and articles action buttons. | |
| Display available translations as dropdown | Instead of a simple icon to list available languages or translation options, show a more visible drop-down list. | |
| Synchronize page and site language | Changing the page language also changes the site language | |
| Restrict search language by default | Only search content that is in the interface language, otherwise show the language menu. | |
| Translation assistant | Track translation operations between pages. | |
| Urgent translation notifications | Enable changes to be flagged as urgent, so translations are marked with a notice visible to all users. | |

| Option | Description | Default |
|---|--|---------|
| Incomplete translation notice | When a page is translated to a new language, a notice will automatically be inserted into the page to indicate that the translation is not yet complete. | |
| Display all languages in a single page | List all languages as options in the page-language dropdown list, to see them all at once. | |
| Quantify change size | In addition to tracking the changes, track the change size and display approximately how up-to-date the page is. | |
| Allow minor edits of wiki pages | Minor edits don't flag new content for translation and don't cause watch notifications to be sent (unless "Watch minor edits" is enabled). | |
| User watches translations | | |
| Multilingual structures | Structures search for equivalent pages in other languages. <i>May cause performance problems with larger structures.</i> | |
| Multilingual tags | Permits translation management of tags | |
| Synchronize multilingual categories | Make sure that the categories of the translations are synchronized when modified on any version. | |
| Synchronized categories | List of categories affected by the multilingual synchronization. Depending on the parent feature, this list will be used as a white list (the only categories allowed) or as a black list (all categories allowed except those specified). | |
| Multilingual dynamic variables | Make dynamic variable content language-specific. | |
| Plugin Translate | Translate text to the user language | |
| Plugin Language | Show alternative content based on the page language | |
| Plugin Translated | Create multilingual links | |
| Use database for translation | Use the database to store the translated strings and allow using interactive translation <i>Edit, export and import languages</i> | |
| Manage contribution of translated strings | Offers to set whether each translated string should be contributed to the Tiki community or kept locally | |
| Record untranslated strings | Keep track of the unsuccessful attempts to translate strings. | |
| Machine translation | Uses machine translation to translate the content of the site to other languages. Note that this feature relies on external services that may not be free. Google Translate is a paid service. | |
| Machine translation implementation | Select between alternate implementations for machine translation. Depending on the implementation, different API keys may be required. | |
| Google Translate API Key | The key must be generated from the Google console. Choose to create a server key. | |
| Bing Translate Client ID | The application must be registered. | |

| Option | Description | Default |
|---|---|---------|
| Bing Translate Client Secret | The application must be registered. | |
| Enable machine translation of wiki pages | Makes additional languages available to the list of languages on the page. | |
| Certain pages redirect to homepage when language is changed | | |
| List of pages that redirect | List of names of pages that always redirect to the homepage when the language is switched <i>Separate page names by commas</i> | |

Intertiki - Client

| Option | Description | Default |
|--------------------------|--|---------|
| Intertiki | Allows several Tiki sites (slaves) to get authentication from a master Tiki site | |
| Client key for this site | This must match the shared key entered in the Master's key field. | |
| Intertiki shared cookie | Causes a user who logs into or out of either the slave or master site to be automatically logged into or out of all other sites. <i>The remember me login feature must be on.</i> | |
| Master Tiki server | Master Tiki server that this client will obtain user authorizations from. <i>Overrides manually registered local users</i> | |
| Import user preferences | Client Tiki will copy the user preferences from the master server. <i>This will overwrite local user preferences every time the user logs in.</i> | |
| Import user groups | Groups the user belongs to on the master server will be imported (along with their security definitions). <i>This will overwrite local groups every time a user logs in.</i> | |
| Limit group import | This list will limit the group import feature to only those groups listed here. <i>Comma-separated list of case-sensitive imported groups. Leave empty to avoid limitation.</i> | |

Intertiki - Master server

| Option | Description | Default |
|------------------------------|---|---------|
| This site is a master server | | |
| Access log file | location, from your tiki root dir, where you want the access log file stored. | |
| Errors log file | location, from your tiki root dir, where you want the error log file stored | |
