Option	Description	Default
Automatically approve wiki-plugins on pages installed by profiles	Some wiki-plugins require admin approval before they are executable. If turned on, then all wiki-plugins that are on wiki pages created via profiles are automatically approved.  <i>Make sure your profiles are not executable or editable by untrusted users.</i>	Disabled
Developer mode	For profiles under an approval workflow, always use the latest version, even if not approved.  <i>Make sure you review the profiles you install.</i>	Disabled
Repository URLs	List of URLs for the profile repositories that will be used  <i>Enter multiple repository URLs, one per line.</i>	http://profiles.tiki.org/pr..
Data channels	Data channels are templates that can be applied from a post request. They can be used to automate work on more complex installations.  <i>Data channels create a named pipe to run profiles from user space. One channel per line. Each line is comma delimited and contains <b>channel name, domain, profile, allowed groups, (optional) \$profilerequest:input\$ matches to groups.</b></i>  <i>There are security considerations related to using data channels. Make sure the profile page is controlled by administrators only.</i>	None
