

# Hard-coded help page links

# To generate

---

```
grep -r '{\$prefs.helpurl}' templates | sed -e "s/^\.*{\$prefs.helpurl}([^\"]*)[\"].*\$/\1/" | sort | uniq | awk '{print  
  "("\$1")~|~ ~|~"}' | tr "+" " "
```

# The pages

See: Restore Help Pages 7x

3.x, we are missing 1- the doc links with the new format {help url= 2- the links in tiki-admin.php Also, the script needs to be double-checked for links with spaces ( ) or pluses (+)

On 13th March 2005, v1.9 had over 210 links to doc.tw.o, and over 120 links to unique pages on doc.tw.o!

# Finding templates with bad help links

To find templates with bad help links:

**ihelp.sh**

```
#!/bin/bash find templates -exec egrep "helpurl.*\${1}" {} \; -print
```

# Help links from Admin Configuration panel

**This section needs a serious cleanup for 3.x (and maybe even 2.x?)**

```
egrep "adminPage|+Config" tiki-admin.php sections="Tiki Features General Login Wiki Image+Galleries  
File+Galleries Articles Polls Search Blog Forum FAQ Tracker Webmail RSS Directory User+Files Maps Meta+Tags  
wikiatt Score Projects Community Site+Identity Site+Logo+and+Identity Calendar" for each in $sections; do echo  
    ("($each"+Config))~|~ ~|~" | tr "+" " "; done
```

**Sat Mar 12, 16:30 UTC**

# Links from plugins (Needs to be done)

plugins have internal link to doc in the plugin.php file. Ex.: 'documentation' => 'PluginMouseover',
