

Roles

Roles is a new feature available from Tiki 21 that makes Groups Management and Permissions setting easier. Think of Roles as a permissions template which you can apply to Categories. It can be used on its own or in conjunction with the older Workspace UI (which needs to be upgraded to make use of Roles without requiring manual adjustments), or in conjunction with the newer Templated Groups which is also introduced in Tiki 21.

For example, if you have 4 groups:

- Science Class Teachers
- Science Class Students
- Math Class Teachers
- Math Class Students

and 2 categories:

- Science Class Handouts
- Math Class Handouts

and you want to make it such that all Teachers can edit handouts but Students can only read the handouts. Without Roles, you would need to set permissions on each of the categories and imagine if you have many other classes such as Geography or History etc... it can be a lot of work. Also, what if you wanted to change the permissions?

With Roles, you can create a "Teacher" Role group and a "Student" Role group which acts as the permissions template for all Teachers and Students regardless of what subject it is for. Instead of setting category permissions for each of the groups, you simply set which group has the role of Teachers and of Students in that group and permissions will be auto-magically mapped.

- Science Class Handouts
 - Teacher Role: Science Class Teachers
 - Student Role: Science Class Students
- Math Class Handouts

- Teacher Role: Math Class Teachers
- Student Role: Math Class Students

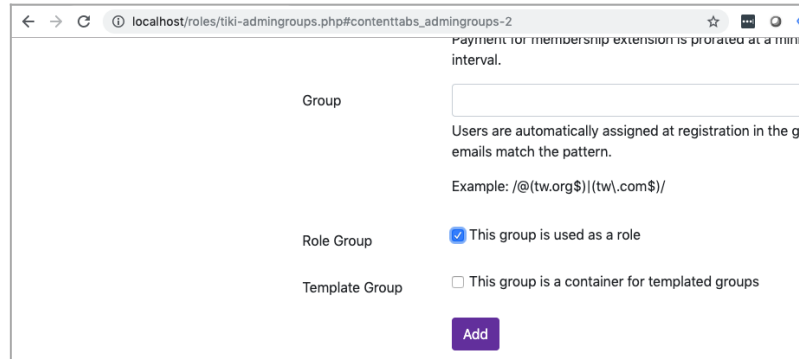

Example

Now, let us walk through how the above example is configured:

(editor's note: this example is used as part of the Templated Groups as well so take note when editing it).

1. Create Role Groups

Create two groups, one "Teachers" and one "Students". Make sure that "Role Group" checkbox is selected for both.

A screenshot of a web browser window showing the 'Add Group' form in Tiki. The browser's address bar shows 'localhost/roles/tiki-admingroups.php#contenttabs_admingroups-2'. The form has three sections: 'Group' with a text input field, 'Role Group' with a checked checkbox labeled 'This group is used as a role', and 'Template Group' with an unchecked checkbox labeled 'This group is a container for templated groups'. There is an 'Add' button at the bottom right. Above the 'Group' field, there is a note about payment for membership extension and a note about email patterns with an example: '/@(\tw.org\$)|(\tw\,com\$)/'.

Click to expand

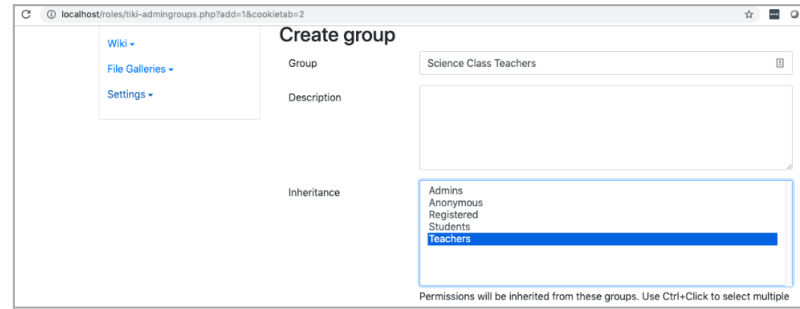

You will note that if you try and put any users into Role Groups, you will be told that Role Groups can't have members
This is by design.

Note: if you apply any Global Permissions to a Role Group, they will work for included groups such as those below
the same as non-Role groups. These are Global Permissions though, not Role Permissions which are set at the
Category Parent level (see below)

2. Create Groups that Include the Role

Create the following 4 groups and include the Teacher or Student Role Group as the case may be:

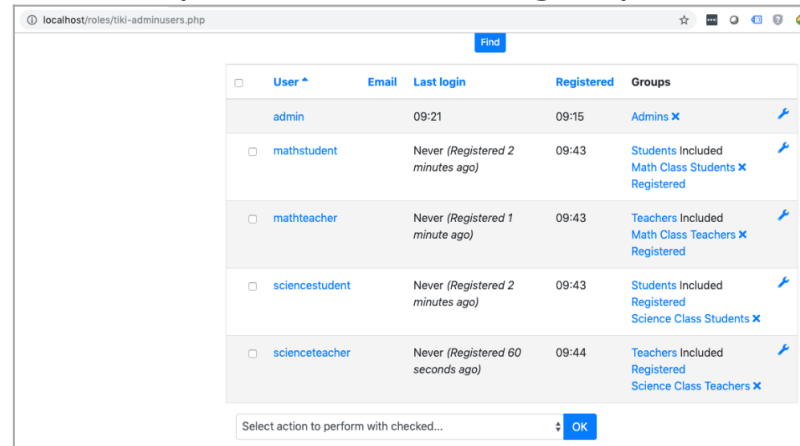

- Science Class Teachers
- Science Class Students
- Math Class Teachers
- Math Class Students

Click to expand

3. Create some test users

Create some test users and put them in these groups for testing/demo purposes.

<input type="checkbox"/>	User ^	Email	Last login	Registered	Groups
	admin		09:21	09:15	Admins ✕
<input type="checkbox"/>	mathstudent		Never (Registered 2 minutes ago)	09:43	Students Included Math Class Students ✕ Registered
<input type="checkbox"/>	mathteacher		Never (Registered 1 minute ago)	09:43	Teachers Included Math Class Teachers ✕ Registered
<input type="checkbox"/>	sciencestudent		Never (Registered 2 minutes ago)	09:43	Students Included Registered Science Class Students ✕
<input type="checkbox"/>	scienceteacher		Never (Registered 60 seconds ago)	09:44	Teachers Included Registered Science Class Teachers ✕

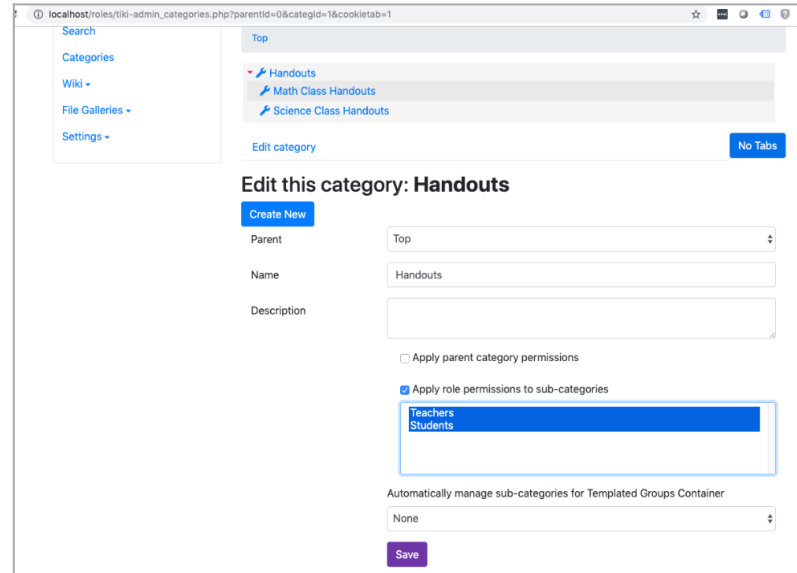

Select action to perform with checked...

Click to expand

4. Create categories

Create a Handouts category with the sub-categories "Science Class Handouts" and "Math Class Handouts".

For the Handouts category, make sure you select the "Apply role permissions to sub-categories" and select both "Students" and "Teachers". By doing this, any permissions that you set on the Handouts category for "Students" and "Teachers" will apply equally to the respective Students and Teachers in each of the sub-categories.

A screenshot of a web browser showing the Tiki Admin Categories page. The browser's address bar displays 'localhost/roles/tiki-admin_categories.php?parentid=0&catid=1&cookietab=1'. On the left, there is a sidebar with links: 'Search', 'Categories', 'Wiki', 'File Galleries', and 'Settings'. The main content area shows a category tree with 'Handouts' expanded, revealing sub-categories 'Math Class Handouts' and 'Science Class Handouts'. Below the tree is an 'Edit category: Handouts' form. The form includes a 'Parent' dropdown set to 'Top', a 'Name' text field with 'Handouts', and an empty 'Description' text area. There are two checkboxes: 'Apply parent category permissions' (unchecked) and 'Apply role permissions to sub-categories' (checked). Below the second checkbox is a multi-select dropdown menu with 'Teachers' and 'Students' selected. At the bottom of the form is an 'Automatically manage sub-categories for Templated Groups Container' dropdown set to 'None' and a 'Save' button.

Click to expand

For each of the sub-categories, specify the exact group that will take on the Group Roles for Student and Teacher as illustrated here:

Settings ▾ Edit category Objects in category Moving objects between categories No Tabs

Add objects to category

Edit this category: Math Class Handouts

Create New

Parent: Handouts

Name: Math Class Handouts

Description:

Group Roles:

Teachers: Math Class Teachers

Students: Math Class Students

☐ Apply parent category permissions

☒ Apply role permissions to sub-categories

Save

▼ wiki

Anonymous	Registered	Teachers	Students	Science Class T...	Math Class T...	Math Class Stu...	Science Class S...	Permission
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Can admin the wiki (tiki_p_admin_wiki)
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Can view page/pages (tiki_p_view)
<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	Can edit pages (tiki_p_edit)
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Can upload pictures to wiki pages (tiki_p_upload_picture)

Click to expand

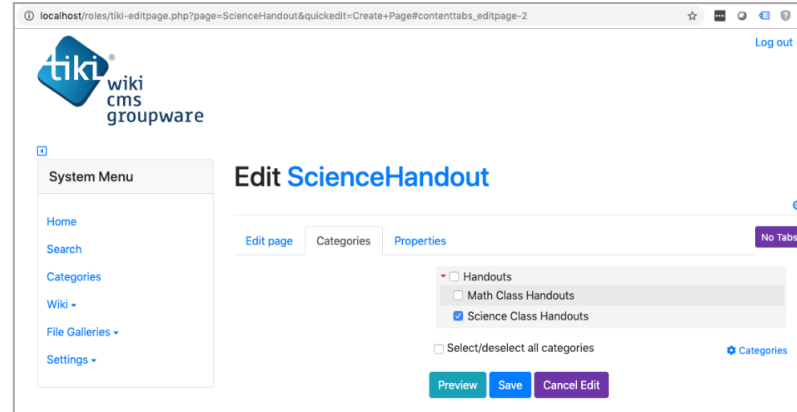

Note: Be aware of group inheritance permissions. For example, if the "Students" group inherits permissions from the "Anonymous" group, and the "Anonymous" group has the tiki_p_edit permission, this permission will

automatically be applied to the "Students" group, even if it is not explicitly checked or assigned.

6. Create test wiki pages

Create a Science Class Handout and a Math Class Handout wiki pages and categorize them accordingly. Test with the demo users to ensure that everything is working as intended.
