

Stub

This page is a stub of information related to the not-very-well-documented simple wiki ratings feature.

ENABLING AND CONFIGURATION

Set "Simple wiki ratings" under Admin Home, Wiki, Features (tiki-admin.php?page=wiki&cookietab=2)

FAQ

1. Where are the results displayed?

`tiki-poll_results.php` ? Seems to not list Simple Wiki Rating results.

`tiki-old_polls.php` ? Seems to not list Simple Wiki Rating results.

The results are tabulated in the database table **tiki_user_votings**. The site pages for which the votes are applied are in field "**id**" with **values** like "wiki2". "Wiki2" in this example, is the Rating Type, "wiki" (as opposed to "article"), and the "2" indicates the "**page_id**" from database table **tiki_pages**.

Don't know yet if there is a page to display the results.

2. Why doesn't the rating bar show up on pages for users with lower permissions?

Because `templates/tiki-show_page.tpl` requires `$tiki_p_assign_perm_wiki_page eq 'y'` . This appears to be a bug. Consider changing that to "`$tiki_p_wiki_vote_ratings eq 'y'`".

3. Can the collected votes be deleted somehow to reset the tally?

FROM LIB/PREFS/WIKI.PHP:

```
'wiki_simple_ratings' => array( 'name' => tra('Simple wiki ratings'), 'description' => tra('Enable users to rate articles based on a simple numeric scale.'), 'type' => 'flag', 'default' => 'n', ), 'wiki_simple_ratings_options' => array( 'name' => tra('Wiki rating options'), 'description' => tra('List of options available for the rating of wiki pages.'), 'type' => 'text', 'separator' => ',', 'filter' => 'int', 'default' => range(1, 5), ),
```

FROM TIKI-ADMIN.PHP:

```
"rating" => array( 'position' => '-300px -215px;', 'icon' => 'img/icons/large/rating.png', 'title' => tr('Rating'), 'help' => 'Advanced+Rating', 'disabled' => $prefs['wiki_simple_ratings'] !== 'y' && $prefs['rating_advanced'] !== 'y' && $prefs['article_user_rating'] !== 'y', ),
```

FROM LIB/RATING/RATINGLIB.PHP

References database table "tiki_user_votings".

```
function get_options( $type ) { $pref = 'rating_default_options'; switch( $type ) { case 'wiki page': $pref = 'wiki_simple_ratings_options'; break; case 'article': $pref = 'article_user_rating_options'; break; } global $tikilib; return $tikilib->get_preference($pref, range(1, 5), true); }
```

FROM LIB/TEST/RATING/REGISTERVOTETEST.PHP

```
function testGetWikiPageRange() { global $prefs; $prefs['wiki_simple_ratings_options'] = range(2, 8); $lib = new RatingLib;
    $this->assertEquals(range(2, 8), $lib->get_options('wiki page')); }
```

FROM TEMPLATES/TIKI-SHOW_PAGE.TPL

\$tiki_p_assign_perm_wiki_page appears to be a bug. Too strong. Should perhaps be \$tiki_p_wiki_vote_ratings .

```
{if $prefs.feature_wiki_ratings eq 'y'} {include file='poll.tpl'} {/if} {if $prefs.wiki_simple_ratings eq 'y' &&
$tiki_p_assign_perm_wiki_page eq 'y'} <form method="post" action=""> {rating type="wiki page" id=$page_id} </form> {/if}
```
