

Slider Comparison

Tiki includes several content sliders (also known as carousels, image rotaters, swipers, or slide shows) that can be used to display a series of images or other content. This table is to provide some help in deciding which one to use.

Slider Name	Plugin Name	Author URL	Code Repository	Since	Status	Pluses	Minuses
Swiper	PluginSwiper (wikiplugin_swiper)	https://swiperjs.com/	Github	Tiki 19	Active (<i>Recommended</i>)	Lots of features. See http://swiperjs.com/demos/	
Bootstrap Carousel	List (wikiplugin_list) PluginList output control block	https://getbootstrap.com/docs/4.6/examples/carousel/	Github		Active	Works with List wiki plugin.	No plugin help modal. Sparse Tiki documentation Depends on Search, which adds a layer of complexity (for example, search set up and index rebuilding).
