

# SLIDER COMPARISON

Tiki includes several content sliders (also known as carousels, image rotaters, swipers, or slide shows) that can be used to display a series of images or other content. This table is to provide some help in deciding which one to use.

---

## Slider Name

Swiper

Bootstrap Carousel

Anything Slider

---

## Plugin Name

PluginSwiper (wikiplugin\_swiper)

List (wikiplugin\_list)

PluginList output control block

Slider (wikiplugin\_slider)

Status

Active (*Recommended*)

Active

Was removed before [Tiki25](#). Support is active but latest code  
Issues being responded to (<https://github.com/CSS-Tricks/>)

---

## Pluses

Lots of features. See <http://swiperjs.com/demos/>

Works with List wiki plugin.

Visual theme options

Interface options

## Minuses

No plugin help modal.

Sparse Tiki documentation.

Depends on [Search](#), which adds a layer of complexity (for example, search set up and index rebuilding).

Doesn't work in a module zone. Also param `resizecontents` needs to be "y" due to incompatibility with current jQuery.

Infinite Carousel

Galleriffic

---

Carousel (wikiplugin\_carousel)

(<https://doc.tiki.org/PluginCarousel>)

Galleriffic (wikiplugin\_galleriffic)
