Spellchecking

iki contains an optional spellchecking ability that uses its own dictionary. When entering wiki text in specific features Tiki can automatically identify misspelled words and offer suggestions.

he language-specific dictionary used by the spellchecker is an additional database table that can be downloaded fror Sourceforge and added to your database.

Spellcheck FAQs

Q: Why does spellcheck flag all capitalized words as incorrect? **A:** Because it has been broken for a *long* time. See this post from 2007.
