

Using the Tiki Spellchecker

If you have permission to edit a specific page or object, and if the **Spellchecking** option for that feature is enabled, then Tiki will display the **Spellcheck** option when you edit a wiki page or text area:

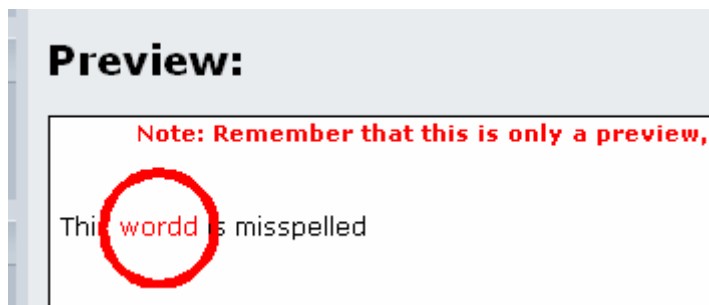

The screenshot shows the Tiki edit interface. The 'Spellcheck' checkbox is circled in red. Other visible elements include the 'Import page' field, 'Upload picture' field, 'Cache' dropdown set to '0 (no cache)', a 'preview' button, a license link for 'Creative Commons Attribution-ShareAlike License', and an 'Important' note: 'please only add here pages related to factual documentation, and that would fit in the structure work, use forums, irc or tw.o.' At the bottom are 'Minor', 'save', and 'cancel edit' buttons.

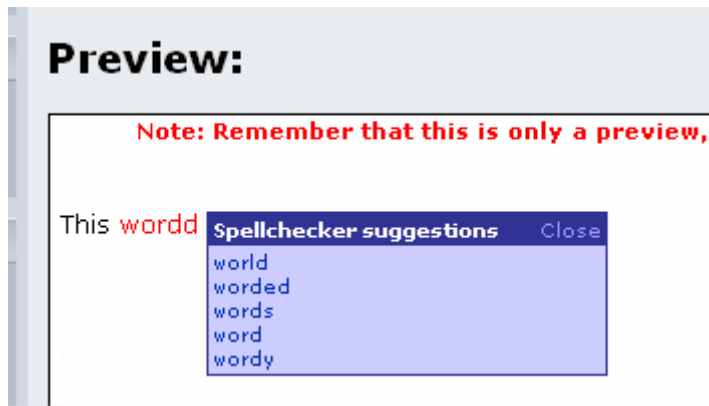

Spellcheck option when editing a wiki page.

To use the spellchecker, use this procedure:

1. Select the **Spellcheck** option.
2. Click **Preview**. Tiki will show a preview of the page with your edits. Any misspelled words will appear red.

3. Click a red word. Tiki will display a list of suggested corrections in a popup window.

4. Click the correct word in the popup menu. Tiki will replace the misspelled word with the selected correction.

Note: Re-preview the page to view the correction.
